Disaggregating NWEA MAP Projections

Chief Accountability Officer, Theodore Dwyer, Ph.D.
Chief Academic Officer, Minika Jenkins
District Assessments

- Education committee review NWEA & MTSS
- Projections
- Use of Data in the classroom
Projections Based on Current Status

• Projections
  • Projections are an estimation of how students will perform given their current performance.
  • There is often a time difference between when the test is being completed and the point at which students will take the test that is being predicted.
    • There are approximately 16 weeks – 12 weeks between when this testing occurred and PSSA.
Reminder – NWEA MAP Assessment

• What information is provided
  • Standards (PA aligned K-12)
  • Projected performance (PSSA, ACT and SAT)
  • English Language Arts (RIT Scores, Standards, Lexiles, growth projections)
  • Mathematics information (RIT Scores, Standards, growth projections)
  • Science (RIT Score, 3-8 PA standards)
Reminder - First Stages of Implementation
NWEA MAP

Schedule:
• First window Sept 3rd – Oct 4th
• Second window Nov 25th – Dec 20th
• Third window (starting Feb 21st )
Things to Keep in Mind About Data

• Data are a thermometer not a condemnation or goal
  • Marine biologists collect data about reefs to document the decline of our oceans.
  • Medical personnel collect data to take action and inform impact of treatments
  • Educators collect and use data to make improvements

• Projections reflect a point in time – the earlier we can get the information the quicker we can use it to improve.
  • There are approximately 16 weeks – 12 weeks between when the last test window and the PSSA.

• Data reflect where we are and where we have been. Having the data allows us to have conversations and set supports.
Disaggregating the Data in the Classroom

Student Profile Report

Reading score could benefit from focus in Vocabulary Acquisition and Use. Visit Instructional Areas for more details about which skills and concepts he is ready to learn.

Compared to his overall score as a strength in Reading Literature. As a student, he can take advantage of this strength when he is learning new material.

GROWTH GOALS

SPRING 2020

Customize the growth target for this student by setting a growth goal

Past Goals

There are no previous goals for this student.

- HIDE

View learning statements to:
- REINFORCE
- DEVELOP
- INTRODUCE

These learning statements apply to current RIT score:

Vocabulary Acquisition and Use

Understand Word Relationships and Expression

CC.1.2.1.b: Use words and phrases acquired through conversations, reading, and being read to, and responding to texts, including words that signal connections and relationships between the words and phrases.

REINFORCE these skills with (61-170):
- Identifies a word based on a description of its purpose or use

DEVELOP these skills (171-190):
- Categorizes words

CC.1.2.2.F: Determine the meaning of words and phrases as they are used in grade-level text including multiple-meaning words.

DEVELOP these skills (171-190):
- Identifies sentences that describe feelings

CC.1.2.2.J: Acquire and use grade-appropriate conversational, general academic, and domain-specific words and phrases.

REINFORCE these skills with (61-170):
- Categorizes words
- Identifies a picture based on a given definition
- Identifies a word based on a description of its purpose or use
- Identifies antonyms of given words in the 2-5 grade band
## Class Breakdown by RIT Report

**Term Rostered:** Winter 2019-2020  
**District:** Pittsburgh Public Schools  
**School:**  
**Weeks of Instruction:** 16 (Winter 2020)

**CC.2.1.K.A.3:** Apply the concept of magnitude to compare numbers and quantities.
- Compares sets of objects within 10 using terms
- Compares whole numbers within 10 using terms
- Compares sets of objects within 10 using terms

**CC.2.1.1.B.2:** Use place-value concepts to represent amounts of tens and ones and to compare two digit numbers.
- Reads and writes whole numbers within 100 in expanded form
- Reads and writes whole numbers within 100 using terms
- Identifies the number of tens and ones in a model
- Represents whole numbers within 20 with models
- Reads and writes whole numbers within 100 as tens and ones
- Represents whole numbers within 100 with models
- Identifies the number of tens and ones in a model
- Applies knowledge of place value or number sense to compose or decompose whole numbers greater than 10 to create equivalent expressions
- Composes or decomposes tens in a model to represent whole numbers within 100 in multiple ways
- Compares whole numbers within 100 using symbols
Use of Data (School & Classroom)

• Schools are using NWEA and other data for continuous improvement
  • Focusing on MTSS (Multi-Tiered System of Support) Tier 1 & Tier 2
    • Explicit and systematic instruction (informed by NWEA, Dibels, optional Unit assessments)
  • Clear differentiation based on PA core standards
  • Including emphasis Text Dependent Analysis in ELA
  • Open ended responses in Mathematics
  • Behavioral supports
    • Positive Behavioral Interventions Supports (PBIS) implementation
    • Restorative Practices (RP)
    • Efficacy (Growth Mindsets)
• Attendance improvements
  • Student & Employee
Thank you
