VISION
All students will graduate high school college, career and life-ready prepared to complete a two-or four-year college degree or workforce certification.

MISSION
The Pittsburgh Public Schools will be one of America’s premier school Districts, student-focused, well-managed, and innovative. We will hold ourselves accountable for preparing all children to achieve academic excellence and strength of character, so that they have the opportunity to succeed in all aspects of life.

DISTRICT BELIEFS
• All children can learn at high levels.
• Teachers have a profound impact on student development, and should have ample training, support and resources.
• Education begins with a safe and healthy learning environment.
• Families are an essential part of the educational process.
• A commitment from the entire community is necessary to build a culture that encourages student achievement.
• Improvement in education is guided by consistent and effective leadership.
• Central office exists to serve students and schools.

DEFINING EQUITY IN PPS
WHAT WE ENVISION: SYSTEMIC EDUCATIONAL EQUITY
Educational equity means “raising the achievement of all students while (1) narrowing the gaps between the lowest and highest performing students and (2) eliminating the racial predictability and disproportionality of which student groups occupy the highest and lowest achievement categories” (Singleton & Linton, 2006).

To enact Systemic Equity, “systems and individuals will habitually operate to ensure that every learner—in whatever learning environment that learner is found—has the greatest opportunity to learn, enhanced by the resources and supports necessary to achieve competence, excellence, independence, responsibility, and self-sufficiency for school and for life” (Scott, 2001, as cited in Skrla, et al, 2004, p. 137).

The true meaning of equity is captured in this illustration of different youth attempting to view the same baseball game. The foundation on which they stand is unequal, for structural racism ensured uneven starting points. The higher ground represents advantage or privilege; the lower ground represents the systemic disadvantage many racial and ethnic minorities experience as a result of historical and existing patterns of discrimination that have impeded access to political, economic and social opportunities.

For this reason, a school system that supports students equally or the same (i.e., giving each student one box to stand on) will in fact perpetuate inequality because all students are not standing on a level playing field to begin with.

Because of inherent inequality, some students will need more in order to access the same opportunities. To offset this, we need to increase access and opportunity to African-American and other under served families. It’s not special treatment; it’s leveling the playing field. Equity—or fairness—is about giving students what they need in order to achieve the outcome. The people on the slope require an additional box or two to stand on—not because they are deficient, but because they are on the lower ground to start. The Boxes represent access and function to provide equal opportunity to overcome barriers to success (i.e., the fence).

FOR THIS REASON, EQUITY IN ACTION IS REPRESENTED BY THE FOLLOWING:

DIVERSITY IN PPS

DEFINING EQUITY IN PPS

WHAT WE ENVISION: SYSTEMIC EDUCATIONAL EQUITY

Educational equity means “raising the achievement of all students while (1) narrowing the gaps between the lowest and highest performing students and (2) eliminating the racial predictability and disproportionality of which student groups occupy the highest and lowest achievement categories” (Singleton & Linton, 2006).

To enact Systemic Equity, “systems and individuals will habitually operate to ensure that every learner—in whatever learning environment that learner is found—has the greatest opportunity to learn, enhanced by the resources and supports necessary to achieve competence, excellence, independence, responsibility, and self-sufficiency for school and for life” (Scott, 2001, as cited in Skrla, et al, 2004, p. 137).

The true meaning of equity is captured in this illustration of different youth attempting to view the same baseball game. The foundation on which they stand is unequal, for structural racism ensured uneven starting points. The higher ground represents advantage or privilege; the lower ground represents the systemic disadvantage many racial and ethnic minorities experience as a result of historical and existing patterns of discrimination that have impeded access to political, economic and social opportunities.

For this reason, a school system that supports students equally or the same (i.e., giving each student one box to stand on) will in fact perpetuate inequality because all students are not standing on a level playing field to begin with.

Because of inherent inequality, some students will need more in order to access the same opportunities. To offset this, we need to increase access and opportunity to African-American and other under served families. It’s not special treatment; it’s leveling the playing field. Equity—or fairness—is about giving students what they need in order to achieve the outcome. The people on the slope require an additional box or two to stand on—not because they are deficient, but because they are on the lower ground to start. The Boxes represent access and function to provide equal opportunity to overcome barriers to success (i.e., the fence).

FOR THIS REASON, EQUITY IN ACTION IS REPRESENTED BY THE FOLLOWING:

1 PROVIDING ACCESS
   Providing whatever supports and accommodations are necessary to ensure all students have access to the same opportunities; giving students whatever they need to achieve the outcome.

2 REMOVING BARRIERS
   The elimination of policies, practices, attitudes and cultural messages that reinforce differential outcomes by race or fail to eliminate them—i.e., addressing the root cause of racial disparities.

A MESSAGE FROM
THE SUPERINTENDENT

Upon my arrival to the Pittsburgh Public Schools (PPS), I was charged by the Board of Directors to eliminate disparities and transform our schools so that they give all students the best opportunity to succeed. I knew this would not be a task that would be achieved overnight, and without a solid, actionable plan to get us there.

After nine months of planning, which included the unprecedented community engagement of more than 3,500 stakeholders, an in-depth data review, and a third-party analysis conducted by the Council of the Great City Schools, in April 2017, we launched the 2017–2022 Strategic Plan: Expect Great Things.

Our strategic plan outlines four long-term outcomes for student proficiency, including the elimination of racial disparity in achievement levels of African American students. The plan also has four strategic themes and 19 initiatives to achieve our goals in three phases. In the first year of our work, from May 2017 through June 2018, we began implementation of nine of those initiatives. As Phase 1 work continues, we have entered Phase 2 implementation of five additional initiatives to impact school culture, support for teachers and staff, and our efforts to foster a culture of high performance for all employees.

Overall our Key Performance Indicators (KPI) demonstrate that we are making progress in most areas. More students are reaching proficiency. Fewer students are missing valuable instructional time due to suspensions. Moreover, more students are taking advantage of a scholarship from the Pittsburgh Promise upon graduation.

Even with this progress, we are unsatisfied by the achievement of our students overall, and the persistent disparities in the academic performance of our African-American students. We maintain our commitment to the continued monitoring of our progress in eliminating racial achievement disparities and supporting the work of the Equity Advisory Panel (EAP), established through our Memorandum of Understanding with the Pennsylvania Human Relations Commission, to inspect our progress.

Change is not a straight arrow, but a winding road, ever moving forward. Our continuous improvement model includes checks to ensure the changes we are making are getting us the results we seek for our students. We take ownership of our work to achieve success, understand now more than ever it is increasingly important that our students attain more than a high school diploma.

I am confident we are on a path to make momentous change for our students. We will only accomplish our goals for students by working together—the school District, schools, families, and community. Our strategic plan is the first step in that direction. Our On Track to Equity Implementation Plan digs deep into the strategies of our strategic plan to call out our intentional efforts to raise the achievement of African-American students. Similar to our strategic plan, the implementation of strategies outlined in our plan, will require the participation of all stakeholders. Together, I am sure we will reach our vision to all students graduating prepared for college, career, and life.

Sincerely,

ANTHONY HAMLET, ED.D.
SUPERINTENDENT
ON TRACK TO EQUITY
HISTORICAL CONTEXT

On August 24, 1992, a complaint against the School District of Pittsburgh was filed with the Pennsylvania Human Relations Commission (PHRC) charging the District violated sections of the Pennsylvania Human Relations Act. The District and the Advocates for African American Students, the group that filed the claim, reached a Conciliation Agreement in September 2006. This original agreement included 94-action steps that address how the District can reduce the achievement gap, provide instructional support, and create an environment of equity for its African-American students. Per the 2006 agreement, representatives from PHRC, the Advocates for African American Students and the District selected members to sit on an Equity Advisory Panel (EAP). Formed in October 2006, the EAP is charged with monitoring, advising and reporting on the District’s progress. The Panel also recommends research-based strategies, methods, techniques and programs that support racial equity. The original Conciliation Agreement also required that the District provide administrative support to coordinate the Conciliation Agreement as well as oversee the monitoring and assessment of data.

EQUITY ADVISORY PANEL MEMBERS PAST AND PRESENT

**MS. WANDA HENDERSON**  
Chair and Original Member of the Advocates for African-American Students

**MS. MARIA SEARCY**  
Parent Consultant, Pennsylvania Department of Education

**MS. TAMANIKA HOWZE**

**DR. ANTHONY MITCHELL**  
Professor of African-American History, Penn State Greater Allegheny

**KIRK HOLBROOK**  
Director, University of Pittsburgh Hill District Community Engagement Center

**LARRY E. DAVIS, PH.D.***  
School of Social Work, University of Pittsburgh

**MS. CELETA HICKMAN**  
Teaching Artist and Parent Organizer, Hill District Education Council

**MARK CONNER*”**  
Pittsburgh Public Schools Parent  
*Former EAP Member

In 2012, following a review of materials submitted by the District per the Conciliation Agreement, the PHRC was not prepared to conclude the District had achieved sufficient progress to justify termination of the agreement. As a result, the District and PHRC agreed to enter into a Memorandum of Understanding (MOU) for an additional two years of monitoring. In 2015 consistent with the shared goal of providing an equal educational opportunity irrespective with race and consistent with the recognized existing racially identifiable academic achievement gap, the PHRC and District entered into a new MOU set to expire on August 30, 2020. This new MOU continued the District’s commitment to the Equity Advisory Panel and the shared goal of equity in education and required the District provide in writing a detailed Implementation Plan that “will detail the action steps which the District will take to accomplish the terms under the MOU.”

**THE CURRENT MOU WAS SIGNED ON OCT. 29, 2015. ACCORDING TO THE MOU, “WITHIN NINE MONTHS OF THE SIGNING OF THIS AGREEMENT, THE DISTRICT WILL PROVIDE IN WRITING TO THE EAP A DETAILED IMPLEMENTATION PLAN. THE IMPLEMENTATION PLAN WILL DETAIL THE ACTION STEPS WHICH THE DISTRICT WILL TAKE IN ORDER TO ACCOMPLISH THE TERMS UNDER THE MOU” (P. 2).**
To ensure “equal educational opportunity irrespective of race, and consistent with the recognized existing racially identifiable academic achievement gap,” the MOU between the PHRC and Pittsburgh Public Schools requires, in writing to the EAP, a detailed implementation plan that details, “the action steps which the District will take in order to accomplish the terms under the MOU.

The MOU outlines 58 items in seven areas: Instructional Support, Equity in Discipline, Reducing the Achievement Gap, Equity in Special Education and Special Program Access; Monitoring, and Administrative and Board Support.

Forty-three of the items identified within the plan are embedded within the District’s Expect Great Things Strategic Plan and/or are being met through the execution of the recommendations of the Council of the Great City Schools.

Below details the key action steps the District is taking to achieve the items included within each area of the MOU and to reach its desired outcomes for students. Action steps, in line with the District’s strategic plan, fall within various phases over a three-year period to ensure sufficient staff capacity, strong implementation planning and continuous monitoring.

Action steps in each area note alignment to items found with the MOU. Multiple MOU items may be met across areas. A detailed crosswalk of District alignment to the items of the MOU is found in the appendix of the plan.

1. BOARD SUPPORT

In the MOU, Board Support refers to the involvement of the Pittsburgh Public Schools Board of Directors. The Board’s Key Performance Indicators align with the measures identified in the MOU. On October 24, 2018, under the leadership of then Board President, Dr. Regina B. Holley, the Board adopted the new comprehensive Policy 102.5 Equity and Excellence in Education which states:

**PURPOSE**

The Board of Education of the School District of Pittsburgh is committed to the success of every student in each of our schools and to achieving our mission of ensuring that all students graduate ready for college, career and life.

The concept of educational equity goes beyond formal equality—where all students are treated the same—to fostering a barrier-free environment where all students, regardless of their race, class or other personal characteristics such as creed, color, religion, ancestry, national origin, age, economic status, gender (including gender identity or expression), sexual orientation, pregnancy status, marital status, physical appearance, the presence of any sensory, mental or physical disability, or the use of a trained dog guide or service animal by a person with a disability, have the opportunity to benefit equally.

The responsibility for student success is broadly shared by the Board of Directors, District staff, administrators, instructors, communities and families.

**AUTHORITY**

It is the right of every student to have an equitable educational experience within the School District of Pittsburgh. This policy will ensure that, in accordance with District policy 12, state 345 and federal laws 6789, the District is focused on closing the opportunity gap by providing historically underserved students with equitable access to programming and support resources and eliminating policies, practices, attitudes, and cultural messages that reinforce individual and institutional bias and create disparate outcomes.

This policy emphasizes the most historically persistent achievement gap, that between white students and students of color such that race must cease to be a predictor of student achievement and success.

TO VIEW THE FULL POLICY PLEASE VISIT WWW.PGHSCHOOLS.ORG/EQUITYPOLICY.

This policy emphasizes the most historically persistent achievement gap, that between white students and students of color such that race must cease to be a predictor of student achievement and success.

TO VIEW THE FULL POLICY PLEASE VISIT WWW.PGHSCHOOLS.ORG/EQUITYPOLICY.
2. INSTRUCTIONAL SUPPORT

The MOU requires the District to implement data-driven and researched-based strategies that provide supports and accommodations necessary to ensure all students, families, and staff have access to the same opportunities. Examination of best practices and ongoing evaluation of techniques are intended to guide the District in making decisions about programs, practices, resources, professional development and assessments to support students intellectually, culturally, socially, and emotionally.

The ultimate goal is to equip staff with learner-centered, equity-focused professional learning, so that they can “improve the learning of all students, including those with different educational needs, learning styles, and incremental abilities, and those from diverse cultural and linguistic backgrounds” (Darling-Hammond, Hyler & Gardner, 2017).

Culture is a tool for learning. Hanley and Noblit (2009) share that culture is “the basis of prior knowledge, which holistically includes cognitive, affective, and psychomotor domains of learning” (pg. 31). However, many school systems across the United States were designed to be monocultural and have reinforced white, middle-class values as the standard, thus invalidating the contributions, perspectives and learning styles of culturally, racially and ethnically diverse populations. Hammond (2015) makes plain that culture is more than a set of characteristics that connect individuals to common groups, for “culture is the way that every brain makes sense of the world” (p. 22). That is to say, students must see themselves in a broader community.

Fifty-three percent of the District’s African-American students are potentially exposed to the disparities in instruction that stem from the monocultural design and imbalance in the teaching population. In essence, their very ties to learning are directly linked to teachers who may not have the necessary tools to ensure students of color have an equal opportunity to achieve success. Hanley and Noblit (2009) report that students of color learn best in culturally congruent settings that foster their positive racial identities. To be clear, this is also true for white middle-class students whose culture is largely reflected in the teaching force, curriculum, and instructional methods. The racially disparate educational outcomes of schooling verify the correlation between culture, racial identity and academic success.

If learning is the ultimate goal of teaching, and culture is central to learning, then culturally responsive education presents an opportunity to ensure every child—regardless of his or her background—has equitable access to the same learning outcomes. Hanley and Noblit (2009) offer that, “The use of students’ cultural knowledge as the core of instruction is more likely to engage students in learning” (p. 28.). If each child’s culture (i.e., language, value system, method of knowing, manner of expression) is valued equally and affirmed evenly through both the content we teach and our methods of delivery, we can essentially provide all students with whatever they need to achieve the desired outcome.

PPS recognizes the significance of alerting educators to blind spots of implicit racial bias, colorblindness and micro aggressions that interfere with one’s capacity to bridge students’ cultures to school, but is committed to improving student outcomes, which will stem from teaching educators about the benefits of culturally-relevant practices, building awareness and appreciation of diverse cultural groups to yield a change in instruction at the core.
CENTERED EDUCATION

The elimination of racial disparities in the achievement levels of African-American students, is one of four
long-term objectives of the District’s Expect Great Things Strategic Plan. Strategic Theme #2’s (Develop and
implement a rigorous aligned instructional system), primary objective is to establish a rigorous District-wide
curriculum and assessment framework that is culturally inclusive.

To meet this goal, PPS will explore instructional content that truly reflects the diversity of Pittsburgh Public
Schools, with particular attention to those who have been historically marginalized in our society and within our
existing curriculum, those of African, Latino, Asian and Native descent.

In PPS, Culturally Responsive Education (CRE) will be a tier one, core system of teaching, pedagogy, curriculum,
thories, attitudes, practices, and instructional materials that center students’ cultures, identities, and contexts
throughout educational systems. By tier one, we mean it is the bedrock of what we offer in PPS.

All students should experience CRE, and the vast majority of students should benefit from CRE. Through
academic content, pedagogy, and equity professional learning, we will maximize the intellective capacity of all
students, specifically students of color by validating, affirming, building and bridging their racial, cultural and
ethnic identities, and effectively close or reverse the racial achievement gap.

In this section, we outline action plans to support the implementation of CRE.

“IF YOU CAN SHOW ME HOW I CAN
CLING TO THAT WHICH IS REAL TO ME,
WHILE TEACHING ME A WAY INTO THE
LARGER SOCIETY, THEN AND ONLY THEN
WILL I DROP MY DEFENSES AND
HOSTILITY, AND I WILL SING YOUR
PRAISES AND HELP YOU TO MAKE THE
DESERT BEAR FRUIT.”

—RALPH ELLISON
The Office of Equity, in collaboration with the Department of Curriculum & Instruction and Office of Professional Learning, works to support the District in implementing sustainable, capacity-building strategies for systemic equity through district-wide professional development. The following parameters will guide the District’s approach to professional learning on culturally relevant pedagogy that will aim to assist PPS in reaching the above stated goals.

- Align to and support the understanding of PPS definition of Culturally Relevant Pedagogy (CRP) adapted from the work of Gloria Ladson-Billings.
  - In PPS, CRP is a framework for teaching that empowers learners by using cultural referents to support construction of knowledge, skills, and attitudes. Essentially, teachers use learners’ lived experiences, backgrounds, and knowledge to authentically engage them in rigorous learning that develops academic success, cultural competence, and critical consciousness.
- Align to and support the understanding of the Courageous Conversations About Race protocol.
- Align to published research and evidence-based practices for African-American learners.
- Incorporate the professional learning standards as defined by Learning Forward.
- Utilize classroom based examples of CRP in practice.
- Provide accompanying tools for practitioner use in understanding CRP at various points throughout the teaching and learning process: planning, teaching, observing, conferencing, feedback, and reflection.
- Contain specific learning objectives and actionable information on what participants should know and be able to do following participation in learning session.
- Model CRP within the design and delivery of content.
- Be relevant to the target audience of teachers, administrators, and district leaders.
- Align to the district framework for high quality instruction.

**OBJECTIVE**

To explore and implement pedagogical strategies and professional learning that support teacher capacity to implement lessons more equitably so that all students, particularly the historically underserved, are actively engaged and experience academic success on par or above their white counterparts.

**BRIEF DESCRIPTION**

PPS will explore and implement pedagogical strategies and professional learning that support teacher capacity to:

- Demonstrate and foster a belief in the ability of all students to achieve at high levels, specifically students of color and English Language Learners.
- Acknowledge and affirm the racial, cultural and linguistic experiences and perspectives of students.
- Embed culturally relevant resources into the curriculum.
- Empower students to take on active roles in the class.
Some external contracts may be necessary to ensure PPS has the expertise to deliver deep learning and the capacity to implement professional learning to a wide audience over an extended period of time.

**CURRENT STATE**
PPS has adopted a definition for Culturally Relevant Pedagogy in the Tenets for High Quality Instruction, which is intended to ground teachers and instructional leaders in focused practice around teaching and learning. One of the components of the PPS Research-Based, Inclusive System of Evaluation for teachers is 3G—Implementing Lessons Equitably. Informal reviews of classroom instruction across the District and principal feedback to teachers indicate an increasing need to ensure both groups have a clear understanding of this component—what it means and how it looks in practice. Furthermore, student achievement indicates instruction is not serving all students equitably.

**DESIRED STATE**
PPS teachers and instructional leaders will share a common understanding of the indicators and critical attributes of Culturally Relevant Pedagogy in theory and practice, as evidenced by the consistent use of culturally responsive instructional strategies and equity-based decision making that ultimately result in the increased engagement and achievement of all students, regardless of race, culture, or linguistic background and specifically the subgroups who have been historically underserved in our district.

**ROLES AND RESPONSIBILITIES**

It is the District’s goal to increase proficiency for all students and eliminate racial disparities in the achievement levels of African-American students. We know that teachers are the number one school-based factor in accelerating student achievement, so we must provide the necessary supports. This priority is indicated in Strategic Theme #3: Provide appropriate instructional support for teachers and staff. Our Research-based, Inclusive System of Evaluation (RISE) includes a comprehensive rubric for teacher effectiveness made up of four domains (Planning and Preparation, Classroom Environment, Teaching and Learning, and Professional Responsibilities) and 24 components of practice within these domains. Of these components, 3G on the RISE rubric relates specifically to the engagement of African-American (AA) students. Support for Culturally Responsive Teaching focuses on 3G, Implementing Lessons Equitably, and will be comprised of (2) strategic initiatives:

- I. Improving Indicators of Effectiveness for 3G
- II. Providing Professional Learning on 3G

### 3G: UNSATISFACTORY

- Few of AA students are actively engaged in learning the majority of the time based on the task structure of the lesson.
- Does not use the six guiding characteristics of Culturally Relevant Pedagogy.
- Teacher permits minority students to opt out of learning.
- Student talk is not seen as essential for learning and for successful completion of task/engagement.
- Student struggle time is not provided.

### 3G: BASIC

- Some AA students are actively engaged in learning.
- Inconsistently uses the six guiding characteristics of Culturally Relevant Pedagogy including: Communicates High Expectations, Builds Relationships and Caring Communities, Communicating a Positive Perspective of Parents and Facilities, Creating Learner-centered Instruction with the Teacher as Facilitator, Structures Learning within the Context of Culture, Enriches the Curriculum.
- Teacher permits some minority students to opt out of learning.
- Some students are provided some struggle time.

### 3G: PROFICIENT

- The majority of AA students are actively engaged in learning the majority of the time.
- The teacher has strong relationships with minority students.
- The teacher does not permit minority students to opt out of learning.
- The teacher provides opportunities for student-to-student talk that engages all students not just the same ones.
- Student talk is seen as essential (part of the student’s narrative) for learning and for successful completion of the task/engagement.
- Student struggle time (individual, pair/share or group) is honored and respected.
- Consistently uses the six guiding characteristics of Culturally Relevant Pedagogy listed in previous column.

### 3G: DISTINGUISHED

- In addition to the characteristics of “proficient.”
- All AA students are actively engaged in learning the majority of the time based on the task structure of the lesson.
- Student-to-student talk engages all students.
OBJECTIVE
To deepen understanding of Component 3G: Implementing Lessons Equitably.

BRIEF DESCRIPTION
To accompany the existing 3G component, PPS will provide critical attributes that provide essential guidance for observers in distinguishing between practice and adjacent levels of performance and possible examples for each level of performance that serve to illustrate the meanings of the rubric language, such as what practice might look like in a range of settings.

CURRENT STATE
Over the past five years, a myriad of professional development and support resources for 3G have permeated the District. There is no common language around 3G among teachers, coaches, principals and central office staff. Informal reviews of classroom instruction across the District and principal feedback to teachers indicate an increasing need to ensure teachers and principals have a clear understanding of the 3G component—what it means and how it looks in practice.

Data from the 2016–17 and 2017–18 school years show the majority of teachers were rated proficient or distinguished (with less than 1% of teachers rated unsatisfactory) on the 3G component, yet little to no evidence was captured by the evaluators for this component and the evidence collection samples from teacher evaluations reveal that substantive and accurate evidence is lacking. Furthermore, student achievement results indicate more focus in this area is necessary to ensure instruction serves all students equitably.

DESIRED STATE
PPS teachers and instructional leaders will share a common understanding of the indicators and critical attributes of Culturally Relevant Pedagogy in theory and practice, as evidenced by the consistent use of culturally responsive instructional strategies and equity based decision making that ultimately result in the increased engagement and achievement of all students, regardless of race, culture or linguistic background and specifically the subgroups who have been historically underserved in our district.

Using RISE, principals will provide sufficient evidence for 3G that mirrors these indicators and critical attributes.

In Pittsburgh Public Schools equity training is designed to help teachers, students, parents, and administrators understand the impact of race on student learning and investigate the role that racism plays in institutionalizing academic achievement disparities.

Participants engage in a thoughtful, compassionate exploration of race and racism and grapple with how each influences the culture and climate of our schools. Attendees practice using strategies for identifying and addressing policies, programs, and practices that negatively impact students of color achievement and serve as barriers for ALL students receiving a world-class education.

Presently, PPS has the capacity to deliver its own equity professional development, as each member of the Equity Office possesses the content knowledge and facilitator expertise to offer professional learning District-wide.

Beyond Diversity
All District staff participate in Beyond Diversity, a two-day seminar designed to help leaders, educators, students, parents, administrators and community participants understand the impact of race on student learning and investigate the role racism plays in institutionalizing academic achievement disparities. Through Beyond Diversity participants gain a foundational understanding of the impact of race on students of color and a common language, to create spaces for Courageous Conversations about Race.

**FOUR AGREEMENTS***

• Stay Engaged
• Experience Discomfort
• Speak Your Truth
• Expect/Accept Non-Closure

*SIX CONDITIONS

1. Focus on Personal, Local & Immediate
2. Isolate Race
3. Normalize Social Construction & Multiple Perspectives
4. Monitor Agreements, Conditions & Establish Parameters
5. Use a “Working Definition” for Race
6. Examine the Presence & Role of “Whiteness”

In the 2017–18 school year, the Office of Equity delivered the training to 382 participants. They continued to serve our primary base of teachers, principals, non-teaching faculty, and central office staff, but we also expanded Beyond Diversity offerings to include 93 clerical staff (30 Student Data Systems Specialists, 51 secretaries and 12 clerks), 107 student teachers/interns, all 8 Heinz Fellows, and 20 PPS high school students. In the 2018–19 school year, they are also providing ongoing, on-site training to the adjunct art teachers at CAPA.
EQUITY AFFILIATES ACTION PLAN

OBJECTIVE
Build the capacity of PPS staff to lead ongoing racial dialogue and professional learning aimed at interrupting institutionalized racism.

BRIEF DESCRIPTION
The Affiliate Program with Pacific Educational Group provides a certification process to develop individuals to lead Courageous Conversations About Race (CCAR) in the District. Racial Equity Affiliates are a cohort of leaders for racial equity charged with supporting the identification and interruption of institutionalized racism within our district in service of our goals of accelerating student achievement and eliminating racial disparities. Through providing professional learning opportunities, internalizing and facilitating the use of the Courageous Conversations About Race Protocol and Guidelines for Equitable Decision Making, advocating on behalf of students, families, communities, and employees of color, and modeling an equitable mindset in their practice, the Affiliates are positioned to help build the equity-focused knowledge-base and capacities of employees throughout the district to create more equitable outcomes for the students and families whom we serve.

CURRENT STATE
The District currently has 13 certified Racial Equity Affiliates across three cohorts, which include both central office and school-based staff. Eight of the Affiliates are certified to facilitate the District’s Beyond Diversity seminar.

DESIRED STATE
During the 2019 calendar year, the Office of Equity will certify at least (9) new Practitioner Affiliates and support the ongoing learning and leadership of all Affiliates to effectively embed Courageous Conversations about Race into data analysis, PLC’s, PBIS core team meetings, MTSS meetings, instructional coaching support, leadership team decision making, and daily reflection.

IMITATIVE WORKPLAN

As leaders for equity, Affiliates are committed to continuous learning to support the development of their own racial consciousness, cultural competencies, and professional practices related to their work. The following activities will occur by Fall 2019:

1. All new Practitioner Affiliates will become trained and certified in the Courageous Conversations protocol and the framework for Systemic Racial Equity Transformation;

2. All new Affiliates will become familiar with the history of the Equity Advisory Panel, the current Memorandum of Understanding (MOU), and the connection between their work and the MOU;

3. All new Affiliates will learn and utilize the guidelines for equitable decision-making;

4. All Affiliates will participate in at least (2) whole group convenings, (1) Affinity group convening, and (3) professional learning seminars that isolate race (e.g., CUE Lecture Series).

In supporting the learning of others, beginning in Fall 2019 and ongoing, Affiliates will provide equity-focused professional learning opportunities for staff that allows them to: (a) help identify and challenge their race-based assumptions and stereotypes, (b) develop their racial consciousness, cultural competencies, and professional practices, and (c) recognize, interrupt, and address systemic racism:

- Facilitator Affiliates will offer a minimum of 8 Beyond Diversity Seminars in 2019 with each Affiliate facilitating a minimum of two during the year.

- Facilitator and Practitioner Affiliates will offer support to the design and/or delivery of equity-focused professional development for instructional coaches, learning environment specialists, principals/assistant principals, and school-based instructional and support teams (i.e., LLI, Network Meetings, Summer Leadership Academy, Center for Urban Education Summer Forum, Coaches Trainings, PLCs, etc.).

- Facilitator and Practitioner Affiliates will coach and support key departments/schools to accomplish the MOU terms.
PROFESSIONAL LEARNING TO ADVANCE EQUITY

Staff across various stakeholder groups will participate in professional learning to advance equity in PPS. The following modules are broken down into levels that follow a sequence of learning. Level one covers foundational knowledge and serves as a prerequisite to more advanced material. Level two focuses on developing instructional leaders. Level three is more involved work, focusing on prolonged coaching to develop culturally responsive teachers on the ground and Equity Affiliates who can deepen and sustain the work.

**ALL TEACHERS AND INSTRUCTIONAL LEADERS**

| Coaching for Cultural Responsiveness: Introduction | Based on the bestselling book, Culturally Responsive Teaching and the Brain, this 1-day workshop is designed to introduce coaches to the various elements of culturally responsive practice and how they work together to create the conditions for students to thrive and embrace rigor. Participants will examine coaching moves needed to be an effective support within a school working toward equity. | Instructional/ Curriculum Leaders who serve in a coaching capacity and who have completed the Foundations Seminar of Culturally Responsive Teaching & The Brain | Transformative Learning Solutions | Cohort: Spring 2020  
Cohort: Winter 2021  
Cohort 3: Summer 2021 |
| E-Racing Discipline: Culturally Responsive Classroom Management | According to Dr. Sharroky Hollie, “In order to have a positive classroom management system, teachers have to separate out cultural behaviors from disruptive behaviors.” In this seminar, participants will learn about practical, culturally responsive strategies for preventing, minimizing, managing and restoring breakdowns in adult-youth relationships by exploring methods that have been proven to result in the reduction of racially disparate discipline referrals and suspensions. By unpacking Dr. Richard Major’s Cool Pose and Lisa Delpit’s Warm Demander, participants will better understand the antecedents, behaviors and consequences that encompass/govern the classroom environment. | Learning Environment Specialists who support teachers in establishing a positive classroom environment | TBD | Summer/Fall 2019 |
| Social-Emotional Learning & Development through a Culturally Responsive Lens | Participants will examine the connection between cognition and social-emotional wellbeing for students. In addition, participants will explore how emotions work for or against diverse students in the classroom depending on whether an intellectually safe space has been created. This session will go beyond over-simplistic strategies to understand how we can integrate affective and relational aspects into instruction in order to help students build an academic mindset. | Learning Environment Specialists who support the implementation of a social-emotional program in classrooms | Transformative Learning Solutions | Winter 2019 |

### LEVEL THREE. COACHING AND EXTENDED JOB-EMBEDDED PROFESSIONAL DEVELOPMENT

**SEE: Sustaining Equitable Environments**

Sustaining Equitable Environments (SEE) is an in-depth professional learning opportunity for teams of teachers and district Learning Environment Specialists to grow as leaders for racial equity and supported the creation of culturally responsive classroom environments/spaces and instruction. Sustaining Equitable Environments Teams participate in a series of full day seminars and multiple on-site coaching and non-evaluative observation cycles designed to support their knowledge and practice. Learning opportunities include time for examining the process and content of instruction, exploring the intersection of race and pedagogy, identifying culturally responsive classroom strategies to incorporate into daily practice and share with colleagues, and developing as leaders for racial equity.

**Targeted Audience:** Teams of Teachers and Learning Environment Specialists

**Provider:** The Director of Equitable Learning Environments, Office of Equity

**Timeline:** Will Be Ongoing, Beginning Summer 2019

### New Staff Orientation – Department of Human Resources

Every employee, in and out of the classroom, is needed to help us reach our district goals of accelerating student achievement, eliminating racial disparities, creating a positive school and district culture, and fostering innovation. As a new employee with Pittsburgh Public Schools, part of the onboarding includes a formal session where participants learn about the vision and mission of the District, as well as the historical context of equity in the District including, but not limited to, the Equity & Excellence in Education Policy and the Conciliation Agreement. As noted in the chart above, all new District employees must complete the Beyond Diversity 2-day seminar.
ACTION STEP 4
BLUEPRINT AND ACTION PLAN: CULTURALLY RESPONSIVE INSTRUCTIONAL MATERIALS

MOU ITEMS: V.c, VI.b

OBJECTIVE
To identify and utilize current and new curricular resources that are Pennsylvania standards-aligned and compatible with the learning styles, lived experiences, scholar identities, and educational and occupational aspirations of historically marginalized racial, ethnic, and cultural groups.

BRIEF DESCRIPTION OF INITIATIVE
PPS will continue to focus on teaching and learning content through a lens of cultural equity by offering Ethnic Studies in the Social Studies and more culturally authentic texts in ELA curriculum. Ethnic studies critically examines historical and contemporary social issues from multiple perspectives, while centering the experiences of historically marginalized groups, to arrive at a plural and multicultural understanding of society. Ethnic Studies focuses on themes of social justice, social responsibility, and social change, allowing students to identify similar social patterns and universal qualities present their own and other societies. Additionally, Ethnic Studies incorporates culturally responsive approaches to instruction through more communal, artistic, interactive and inquiry-based methods.

CURRENT STATE
Fifty-three percent of the students who attend Pittsburgh Public Schools are African American and another fourteen percent identify as non-White, but some curricular resources are still outdated and do not consistently reflect the aforementioned representation making it difficult to engage all groups in equitable learning experiences. The Social Studies curriculum is one specific resource that must be updated to ensure people of African, Latin, Asian and Native descent are represented, yielding a timely opportunity to build a course of studies that meaningfully engages and centers voices from the margins. While the District has been purposeful, incorporating texts, materials and activities that allow students to have positive reflections of themselves, currently the District offers two college-level courses dedicated to examining African-American History.

African-American History Course
This upper level college preparatory course of study enables students to examine people of African descent in America as active agents in history. Through multiple interpretations, conflicting accounts, and a variety of primary sources, students analyze, interpret, and compose their own insightful ways of explaining, comprehending, and producing African-American History. The course develops students’ historical thinking skills and historical understanding of African-American History. Embedded in the 2nd semester of the course are five major eras between 1865 to the present, six principle themes, and five frameworks. Students will use these tools to examine sources of evidence and secondary sources used to interpret, create and write African-American history.

African-American Literature Course
African-American Literature, a one-credit 12th Grade course, is available to District students as an alternative to English 4. While works by African Americans are part of the English curriculum throughout high school, this 12th Grade course is unique. The core literary works chosen for the course align with the major eras and frameworks students learn about in the District’s African-American History course.
African-American History Challenge Bowl
PPS is in its 25th year of holding an annual African-American History Challenge Bowl. Sponsored by Pittsburgh Public Schools and the 100 Black Men of Western Pennsylvania, the African-American History Challenge Bowl is open to teams of students in Grades 6–12 from our K–8, Middle, 6–12, and High Schools. Students compete in this tournament by answering questions around such categories as: Arts and Entertainment, Biography, Facts and Trivia, History, Science and Discovery, and Sports.

Document Based Questions
Stanford History Education Group’s Historical Thinking Skills and the Document Based Question (DBQ) are used throughout Social Studies 6-12 classrooms to support the application of literacy strategies and historical thinking skills. The DBQ Project was specifically created to address the achievement gap. It democratizes the process of historical text-based comparison, analysis, discussion, and evidence-based writing so that ALL students will have the tools and dispositions to be able to access AP level courses. For the 2018–2019 school year, this process has been vertically aligned down to grade K, creating a true continuum to ensure increased enrollment and success of all students, especially African American students, in advanced courses.

DESIRED STATE
All PPS students K–12 will experience an Ethnic Studies curriculum through the design and/or adoption of teaching and learning materials in Social Studies. The District will continue to provide exposure to culturally authentic text throughout the ELA curriculum.

ACTION ITEM

2. Identify members of Ethnic Studies Advisory Group.
3. Advisory Group Orientation
4. Advisory Group meetings held to assess what currently exists in the District’s Social Studies/History curriculum as it pertains to the African Diaspora, Latin, Asian, and Native groups and propose a plan for integrating these groups into the curriculum.
5. Present Implementation Recommendations to the Superintendent and Executive Cabinet.
6. Present Implementation Plan to Board of Education at Education Committee Meeting.
7. Design Team Meetings Held to Execute the Implementation Plan.
9. Adoption of Instructional Materials.

PHASE 1: FEBRUARY–DECEMBER 2019

PHASE 2: JANUARY–AUGUST 2020

10. Professional Learning for Classroom Teachers who will Deliver Curriculum Units.
11. Teachers Deliver Curriculum Units in Classrooms.
OBJECTIVE
To control for racial, ethnic, and cultural biases in curricular materials.

BRIEF DESCRIPTION OF INITIATIVE
PPS will implement systems for the careful examination of curricular materials, such as texts, curriculum units, and assessments to ensure all students, regardless of their backgrounds, have a fair chance to access learning materials and demonstrate their knowledge.

CURRENT STATE
Currently, the District does not have a comprehensive system in place for the review of curriculum to ensure all students have equitable access to a rigorous education. For new adoptions, the Department of Curriculum and Instruction does conduct program evaluations that have criteria for Cultural Relevance, Multiculturalism, and Disability Responsiveness. These evaluations are infused in the textbook adoption process and guide the feedback and decisions reviewers are asked to provide.

For example, when evaluating a textbook, reviewers are asked to rate evidence of multiple perspectives, diverse instructional strategies, differentiation, and avoidance of stereotypes and prejudice—to name a few. Reviewers are largely voluntary and there are no equity-based criteria for reviewers to meet in order to carry out this evaluation with the necessary skills to identify bias.

Reviews of curriculum-based assessments and curriculum delivery are not conducted. The Council of Great City Schools Report (2016) recommends that “the lack of improvement in student achievement appears to be due to a weak Tier I (basic) instructional program” and “low expectations for student performance” (p. 38). For this reason, the Expect Great Things Strategic Plan explicitly aims to develop a comprehensive assessment system aligned to grade-level expectations.

DESIRED STATE
PPS will have implement reviews of curriculum, curriculum access and assessment items to control for bias on a consistent basis.

ROLES AND RESPONSIBILITIES
INITIATIVE OVERSIGHT
Oversight
DATA REVIEW PROCESS FOR GROUP IRREGULARITIES ACTION ITEM
Office of Data, Research, Evaluation and Assessment.

DESCRIPTION
The Director of Assessment will convene a committee of PPS staff from across various departments, including the Office of Equity, to conduct test item analysis on curriculum-based assessments. Item bias detection procedures will be used to determine whether the test items administered to students exhibit bias towards one group or another, along racial and ethnic lines.

START/END DATE
Fall 2021 / Ongoing

CURRICULUM AUDIT ACTION ITEM
Curriculum & Instruction
DESCRIPTION
PPS will post a request for proposals and request Board authorization to partner with an external curriculum auditor to examine to improve the development and delivery of curriculum for historically underserved students, which includes but is not limited to African American students and economically disadvantaged students. As part of the audit the team will determine a process for helping parents, teachers, students, and community members understand the extent to which their schools’ English Language Arts Curricula are (or are not) culturally responsive.

START/END DATE
Spring/Summer 2021 (pending Board approval) / June 2022

District schools identified for Comprehensive Support and Improvement under ESSA (CSI) are supported at least twice a month through the Instructional Review Process. The Office of School Transformation participates in the review process and collaborates with the Office of School Performance and Office of Curriculum and Instruction to write the Instructional Review Action Plan for sustainability and improvement; along with school-based leadership, they comprise the Collaborative Instructional Review Team (CIRT).

The instructional review involves a day-long visit to the school with the Collaborative Instructional Review Team (CIRT). The purpose of the visit is to understand school-based data in an authentic school environment to determine the appropriate actions and supports necessary to advance student achievement. The collaborative nature of this monitoring process allows for increased alignment, clear expectations, shared learning, and targeted feedback and support.

Across the state of Pennsylvania, African-American students consistently rate among the lowest performing subgroups. While, the District is decreasing the achievement gap at a higher rate than the state overall, much work is needed to reach its desired outcomes for students. Through the evaluation of data and its Instructional Review Process, District leadership is beginning to identify schools that can provide insight into best practices for moving achievement among African-American students.
Pennsylvania Department of Education (PDE) Secretary Pedro A. Rivera highlighted Pittsburgh Public Schools as one of three school districts in the state to participate in Pennsylvania’s Comprehensive System for District and School Improvement pilot during the 2017–2018 school year. As noted in the Pittsburgh Post-Gazette the District’s “latest efforts to turn around its struggling schools are going to be a model for other Pennsylvania districts looking to boost their performance.” (Pittsburgh Public Schools partners with PA, on school improvement plan—July 16, 2018.) The District was positioned to meaningfully participate in this pilot due to the launch of our five-year Strategic Plan, Expect Great Things and the information we gathered as part of our new Instructional Review Process.

The District learned a lot from the school leadership teams at 11 schools, who in collaboration with Network Assistant Superintendents, District leadership, and improvement facilitators provided by PDE, were able to help the state field-test school improvement tools and identify opportunities to align school and District-level planning with the state’s emerging school improvement framework. We have strengthened the School Improvement Plan development and monitoring process by using School Improvement Plans as living documents subject to regular reviews and updates.

The goal of this revised process is to increase our collective capacity to identify, analyze, and correct foundational issues that impact performance challenges and to increase the efficiency and efficacy of school improvement efforts. While not required, all District schools engage in a needs assessment process utilizing the State’s Essential Practices rubric, which provides a strong platform for discussion amongst school leadership teams to engage in needs-assessment. On August 14, 2018, District facilitators were trained to support the process.

While there is a compliance component to school improvement planning, PPS is confident that true improvement planning, that includes clear targets, ownership of responsibility, and research-based strategies will progressively shift behaviors and create cultures of high expectations, thus increasing all students’ ability to meet college, career, and life readiness indicators.

Federal School Accountability Determinations
On December 13, 2018, PDE released federal school accountability determinations via the Future Ready PA Index. Under the Every Student Succeeds Act (ESSA) state education agencies must implement a system of school accountability that makes at least two types of designations, Comprehensive Support and Improvement (CSI) and Additional Targeted Support and Improvement (A-TSI). The table below provides a high-level overview of the two federally-prescribed accountability designations:
Pennsylvania’s process for determining CSI schools uses two years of achievement data (PSSA/Keystone/PASA) and two years of growth data (PVAAS), as well as two years of most student success measures to gradually narrow the number of eligible schools until the state identifies at least five percent of Title I buildings statewide.

A-TSI schools were identified in a method consistent with the overall approach to CSI identification. For the first round of determination, any school in which one or more student groups performed below the CSI thresholds for both academic proficiency and academic growth, as well as one or more of the following indicators: graduation rate, progress in achieving English language proficiency, or chronic absenteeism (regular attendance) were identified for A-TSI.

CSI schools will receive direct support from PDE to develop and implement improvement plans that focus on individual school needs. A-TSI schools will also receive technical assistance from the state in developing and implementing a locally approved improvement plan. Both designations are for three years.

In PPS, 13 schools received support designations under the State’s system.

OFFICE OF SCHOOL TRANSFORMATION

The School Transformation Office will improve Differentiated Accountability and Equitable Support to schools identified for intensive support with closing the achievement gap through capacity building, job embedded professional development, monitoring and feedback.

SCHOOL TRANSFORMATION THEORY OF ACTION

IF WE...

1. Develop our school leaders and establish school-wide systems of operation.
2. Use data to drive decisions, build teacher capacity and provide job embedded professional development.
3. Monitor the fidelity of implementation of the SIP and provide feedback for continuous improvement.
4. Will accelerate student achievement and reduce disparities among subgroups.

THEN WE...

PRIMARY SUPPORT FEATURES OF TRANSFORMATION SCHOOLS

1. Identity Development: It is critical for the student-teacher connection when implementing Culturally Relevant Pedagogy.
2. Equity and Excellence: Include student cultural experiences and set high expectations for the students to reach.
4. Teaching the Whole Child: Teaching the Whole Child is a theme that includes the concepts of skill development in a cultural context, home-school-community collaboration, learning outcomes, supportive learning community and empowerment.
5. Student Teacher Relationships: The theme of Student-Teacher Relationship within the context of culturally relevant pedagogy aligns itself closely with the concepts of “caring, relationships, interaction, and classroom atmosphere.

TO CLOSE OPPORTUNITY GAPS IN TRANSFORMATION SCHOOLS WE MUST:

- Ensure every classroom has a “high quality” teacher
- Support campuses with health care information (parent nights)
- Inform parents about pre-K and magnet programs
- Assist students with support to excel on college entrance exams
- Expose students to higher level courses (AP) and ensure they are successful
With defined milestones, the Assistant Superintendent of School Transformation will provide coaching support to school leaders using the Seven Critical Success Factors (CSF) as key components of successful schools:

1. **Academic Performance**: Academic Performance is the foundational CSF. By focusing on data driven instruction that targets the use of on-going monitoring of instruction, schools can increase performance for all students. Curricular alignment, both horizontally and vertically, is also an essential component of this CSF.

2. **Use of Quality Data to Drive Instruction**: Use of Quality Data to Drive Instruction emphasizes data disaggregation training and ongoing communication of data to improve student learning outcomes. A focus of this CSF is utilizing data to drive decisions.

3. **Leadership Effectiveness**: Leadership Effectiveness targets the need for leadership on the campus to exercise operational flexibility and the effective use of data and resources. Providing job-embedded professional development to build capacity of campus leaders is a vital part of this CSF.

4. **Increased Learning Time**: Increased Learning Time necessitates flexible scheduling that allows time for additional instructional minutes, enrichment activities and staff collaborative planning time. This CSF also confirms as a requisite, an instructionally-focused calendar.

5. **Family/Community Engagement**: Family and Community Engagement calls for increased opportunities for input from parents and the community, as well as the necessity for effective communication and access to community services.

6. **School Climate**: School Climate recognizes increased attendance and reduced discipline referrals as indicators of a positive and welcoming environment. Increased attendance in extracurricular activities is another sign that students feel supported by an affirming school climate.

7. **Teacher Quality**: Teacher Quality focuses on the need to recruit and retain effective teachers while also supporting current staff with job-embedded professional development. A locally developed appraisal and evaluation system informs personnel decisions in order to ensure quality teaching and learning.
ACTION STEP 10
EQUITABLY DISTRIBUTED RESOURCES

As part of the District’s work in Strategic Theme #2, Strategic Initiative 1. Implement an instruction system with aligned and equitably distributed resources, a team is developing a formula to further allocate resources based off of student need.

The District’s Site-Based Budget has been designed with an eye towards transparency and equity of resource allocation. It is based off a per-student allocation that is checked to ensure that each school is able to cover its Service Delivery Model. This formula was developed in conjunction with the Budget Office and the Office of School Performance.

Key factors considered during site-based budgeting include:

- All completed budgets must ensure that the District’s Service Delivery Model standards are met, and will be reviewed to ensure as much.
- For both Site-Based and Title I Funding, schools are given a lump sum of money to be distributed as they deem appropriate to the needs of their schools.
- Schools are permitted to file allocation appeals to their budgets for additional funding to their budget for a specific purpose.
- CTE Elective courses can be offered in grades 6–8 with the necessary resources to offer those courses.

Key Investments to Support Students and Teachers

Through the process of strategic shedding—examining what’s working, what roles need converted, and what needs prioritized—the District has made key investments, within its existing budget, to bolster its support services to schools. Some of these efforts have included increasing library services by adding at least a half-time librarian in every elementary school, providing 60 academic coaches to help teachers learn new techniques, and adding additional school nurses to ensure nursing services on every campus.
We know that the work of eliminating racial disparities in the achievement levels of our African-American students will not be accomplished by the District alone. It is clear that Pittsburghers are passionate about public education, and there are many who want to roll up their sleeves and help us achieve our desired outcomes for students, not only for our students, but for the vitality of our city. Objective 2 of Strategic Theme 1: Create a positive and supportive school culture, requires the District to “Establish a shared commitment and responsibility for positive relationships with every student, family, and staff member.” This objective is supported by Strategic Initiative 2b. Develop and communicate explicit and consistent expectations for staff interactions with students and families. At the District level, the Office of Family, Youth & Community Engagement supports the creation of these partnerships through working on the following initiatives:

- Annual PPS Parent Survey: Sent to the parents or guardians of all Pittsburgh Public Schools students to determine the parents’ opinions and awareness of the District’s efforts at the District- and school-levels.

- Community Schools: A partnership between the District, schools, families, and community resources to holistically support students and promote student achievement.

- Family And Community Engagement (FACE) Coordinators: School-based staff members in every school who collaborate with school staff, parents and family members, and community organizations to provide a network of support for students.

- PPS Student Voice: There are several ways student voice has been elevated throughout the District, including:
  - Student Advisory Council: a District-wide leadership opportunity for elected students to share the interests and concerns of students at their schools with PPS administration and provide input on school and District initiatives.
  - Youth Participatory Budget Council: In June 2018, the Pittsburgh Public Schools (PPS) and City of Pittsburgh launched the PPS Youth Participatory Budget Council composed of 20 student representatives, from across all nine districts. The YPBC was shaped to provide youth an opportunity to vote for their preferred policies. As part of the YBPC, students learned about the inner workings of city government and the school District as they created a proposal for how to use funds on a capital project.
  - Student Specific Input Sessions: To gain student input on key programs and initiatives, Dr. Hamlet has held multiple student input sessions on various topics including, the Strategic Plan, Student Code of Conduct, and Proposed enhancement to the strategic plan. Each session brought groups of students from each school serving students in grades 9–12 to ensure student voice is at the table.
  - The Student Envoy Project is a student leadership program focused on enhancing peer culture through the student-led teaching and reinforcement of efficacious mindsets and practices. Students are selected within their buildings to be trained as Student Envoys based on proven leadership abilities, representation of strong character, and a willingness to positively impact classroom and school-wide culture. Student Envoys are given a variety of responsibilities to make themselves, their schools and their communities better, stronger and smarter.
We know that the work of eliminating racial disparities in the achievement levels of our African-American students will not be accomplished by the District alone. It is clear that Pittsburghers are passionate about public education, and there are many who want to roll up their sleeves and help us achieve our desired outcomes for students, not only for our students, but for the vitality of our city.

Objective 2 of Strategic Theme 1: Create a positive and supportive school culture, requires the District to “Establish a shared commitment and responsibility for positive relationships with every student, family, and staff member.” This objective is supported by Strategic Initiative 2b. Develop and communicate explicit and consistent expectations for staff interactions with students and families. At the District level, the Office of Family, Youth & Community Engagement supports the creation of these partnerships through working on the following initiatives:

- Annual PPS Parent Survey: Sent to the parents or guardians of all Pittsburgh Public Schools students to determine the parents’ opinions and awareness of the District’s efforts at the District- and school-levels.
- Community Schools: A partnership between the District, schools, families, and community resources to holistically support students and promote student achievement.
- Family And Community Engagement (FACE) Coordinators: School-based staff members in every school who collaborate with school staff, parents and family members, and community organizations to provide a network of support for students.

  - Youth Participatory Budget Council: In June 2018, the Pittsburgh Public Schools (PPS) and City of Pittsburgh launched the PPS Youth Participatory Budget Council composed of 20 student representatives, from across all nine districts. The YPBC was shaped to provide youth an opportunity to vote for their preferred policies. As part of the YBPC, students learned about the inner workings of city government and the school District as they created a proposal for how to use funds on a capital project.
  - Student Specific Input Sessions: To gain student input on key programs and initiatives, Dr. Hamlet has held multiple student input sessions on various topics including, the Strategic Plan, Student Code of Conduct, and Proposed enhancement to the strategic plan. Each session brought groups of students from each school serving students in grades 9–12 to ensure student voice is at the table.
  - The Student Envoy Project is a student leadership program focused on enhancing peer culture through the student-led teaching and reinforcement of efficacious mindsets and practices. Students are selected within their buildings to be trained as Student Envoys based on proven leadership abilities, representation of strong character, and a willingness to positively impact classroom and school-wide culture. Student Envoys are given a variety of responsibilities to make themselves, their schools and their communities better, stronger and smarter.

To successfully fulfill these roles, Student Envoys are trained on a toolkit of mindsets and skills known as The 5 Secrets that help students build self and collective efficacy. During the 2018–2019 school year, over two hundred 3rd-12th students participate in the Student Envoy Project from Pittsburgh Arsenal K–5, Brookline K–8, Lincoln K–5, Mifflin K–8, Miller K–5, Milliones 6–12, Montessori K–5, Sterrett 6–8 and Westinghouse 6–12.

- District-wide Parent Advisory Council (PAC) composed of parent representation from every District school. The PAC has parent representation from every District school. These parents serve as liaisons to parents at their school. PAC trainings to date have included:
  - Changes to the Code of Student Conduct
  - Music Education and Recruitment
  - Best Practices in Parent Engagement
- Public Hearings: Facilitates and provides follow-up communication to constituents who testify.
Nationally, community schools are recognized as “smart schools” that improve students’ learning by combining traditional approaches with community-based resources to support students’ academic success. They can help build stronger communities by enlisting parents and families to address barriers to learning. Many teachers say they feel that they are more effective in community schools. Through strategic partnerships, the Community Schools will promote student achievement, positive conditions for learning, and the well-being of families and communities.

In May 2017, a 26-member steering committee developed a formal community schools process and designated five community schools, as part of Phase 1, following a rigorous application process that gained interest from 21 schools: Pittsburgh Westinghouse, Pittsburgh Faison, Pittsburgh Lincoln, Pittsburgh Arsenal 6–8 and Pittsburgh Langley K–8.

In January 2019, the District recommended the expansion of Community Schools as part of Phase 2—moving from 5 to 8 to include: Pittsburgh Arlington K–8, Pittsburgh King K–8, and Pittsburgh Milliones 6–12. The designations additionally expand the model regionally, extending community schools to the South, North, and Central areas of the city.

Phase 2 Designated Community Schools were selected based on multiple data points, such as graduation rates, homelessness, and attendance rates. Also, school leader and school community buy-in, community stakeholder support, and physical space were all considerations in the District’s selection process.

A Community Schools Site Manager is assigned to each Community School. The Community School Site Managers work daily with school-based staff, students, families, and the greater community.
Nationally, community schools are recognized as “smart schools” that improve students’ learning by combining traditional approaches with community-based resources to support students’ academic success. They can help build stronger communities by enlisting parents and families to address barriers to learning. Many teachers say they feel that they are more effective in community schools. Through strategic partnerships, the Community Schools will promote student achievement, positive conditions for learning, and the well-being of families and communities.

A Community Schools Site Manager is assigned to each Community School. The Community School Site Managers work daily with school-based staff, students, families, and the greater community.
In Phase 1 of Strategic Theme #1: Create a Positive and Supportive School Culture the District created a Multi-Tiered System of Support (MTSS) which includes academic supports and interventions, as well as key behavioral supports for teachers, including Restorative Practices, Positive Behavioral Interventions and Supports (PBIS), and the Student Assistance Program (SAP). These research-based tools utilize data, coaching and collaboration to take a comprehensive approach to meeting the academic, social, emotional and behavioral development needs of students. All school psychologists have been trained on the District’s Multi-Tiered System of Support (MTSS), and a MTSS handbook was developed and distributed.

Positive Behavioral Interventions and Supports (PBIS)—MOU Item: V.d.

The school-wide PBIS program includes teaching expectations and positive reinforcement because students will succeed when offered informative corrective feedback and pro-social skills. When students know what is expected of them, they are more likely to behave appropriately.

With that thought in mind, principals, teachers, and staff at every school in the District work together to set up behavioral expectations and subsequent rewards that are specific to their school. Expectations are reinforced and acknowledged at places like morning meetings, classrooms, and school-wide events.

The implementation of PBIS may vary from PreK to high school, but the premises are the same. This approach is designed to promote positive, proactive, and preventable behaviors through the development of predictable, sustainable, and consistent supports and interventions. See the next page for how PBIS is structured.

Tier #1 focuses on school-wide programs and practices that apply to everyone in the building and serves as the primary level of behavior intervention prevention. This would include classroom management strategies that establish basic expectations for students, public posting of expectations, frequent acknowledgments, and teaching desired behaviors. Approximately 85% of students meet the expectations and are rewarded for their good behavior.

Tier #2 acknowledges that some students need additional support to keep their behavior on track. Teachers and staff meet with these students in small groups to set more specific behavior objectives. Using Restorative Practices techniques, they work together to help the students understand how their behavior affects others and strive to welcome them back into the classroom and school community. Only 10% of all students fall into this group.

IN PPS WE BELIEVE ALL STUDENTS, EVEN ONES WHO STRUGGLE WITH APPROPRIATE BEHAVIOR, CAN ACHIEVE SUCCESS AND LEARN SOCIAL AND EMOTIONAL SKILLS THAT WILL HELP THEM BE SUCCESSFUL IN SCHOOL AND IN LIFE.

3. EQUITY IN DISCIPLINE

In the MOU, Equity in Discipline refers to the reduction of racial bias that results in the disproportionately high assignment of disciplinary referrals, suspensions and other forms of exclusionary discipline to African American students. To the extent that staff are equipped to analyze discipline data, examine implicit bias, incorporate culturally responsive strategies for preventing, minimizing, managing and restoring breakdowns in adult-youth relationships, and establish and maintain supportive settings that celebrate diversity, they can improve school climate and interrupt discriminatory discipline.

Research on school improvement has consistently found that transforming school cultures is difficult work, but it can be done. In addition to supporting the academic growth of students, schools must also provide students the social-emotional tools they need to become young adults who build upon their success and learn from their failures. This development is what we want for every PPS student.

We know that children respond to validation and affirmation of what they do right. They seek approval, and it’s the job of schools and staff to “accentuate the positive and eliminate the negative,” just like the old song by Harold Arlan and Johnny Mercer says. When we reinforce the positive deeds and qualities of our students with enthusiasm and encouragement, students will recognize the value of positive actions.
In Phase 1 of Strategic Theme #1: Create a Positive and Supportive School Culture the District created a Multi-Tiered System of Support (MTSS) which, includes academic supports and interventions, as well as key behavioral supports for teachers, including Restorative Practices, Positive Behavioral Interventions and Supports (PBIS), and the Student Assistance Program (SAP). These research-based tools utilize data, coaching and collaboration to take a comprehensive approach to meeting the academic, social, emotional and behavioral development needs of students. All school psychologists have been trained on the District’s Multi-Tiered System of Support (MTSS), and a MTSS handbook was developed and distributed.

Positive Behavioral Interventions and Supports (PBIS)—MOU Item: V.d.
The school-wide PBIS program includes teaching expectations and positive reinforcement because students will succeed when offered informative corrective feedback and pro-social skills. When students know what is expected of them, they are more likely to behave appropriately.

With that thought in mind, principals, teachers, and staff at every school in the District work together to set up behavioral expectations and subsequent rewards that are specific to their school. Expectations are reinforced and acknowledged at places like morning meetings, classrooms, and school-wide events.

The implementation of PBIS may vary from PreK to high school, but the premises are the same. This approach is designed to promote positive, proactive, and preventable behaviors through the development of predictable, sustainable, and consistent supports and interventions. See the next page for how PBIS is structured.

**Tier #1** focuses on school-wide programs and practices that apply to everyone in the building and serves as the primary level of behavior intervention prevention. This would include classroom management strategies that establish basic expectations for students, public posting of expectations, frequent acknowledgments, and teaching desired behaviors. Approximately 85% of students meet the expectations and are rewarded for their good behavior.

**Tier #2** acknowledges that some students need additional support to keep their behavior on track. Teachers and staff meet with these students in small groups to set more specific behavior objectives. Using Restorative Practices techniques, they work together to help the students understand how their behavior affects others and strive to welcome them back into the classroom and school community. Only 10% of all students fall into this group.
Tier #3 services provide individualized interventions for students with more intensive needs. If a student does not respond to Tier 1 and Tier 2 interventions, he or she will be given an individualized behavior or academic plan to help them achieve their goals.

The implementation of a new PBIS Digital Referral System allows school staff to make informed decisions related to student discipline. The recently created PBIS dashboard allows District leadership to analyze all disciplinary factors in each school building. The District has taken several steps to ensure the successful implementation of PBIS in every school and center program:

- All schools identify teams to support implementation of Positive Behavioral Interventions and Supports (PBIS).
- All PBIS school teams receive 2-day training.
- All schools develop and implement PBIS plans.

**MULTI-TIERED SYSTEMS OF SUPPORT (MTSS)**

**ACADEMIC SUPPORTS & INTERVENTIONS**

- Intense instructional support to the students with the greatest needs, with frequent progress monitoring.

**Supports & Interventions**

- **English Language Arts (SLA)**
  - Edmentum Adaptive Intervention Solution, Credit Recovery
  - Just Words
  - Read Naturally
  - Read 180
  - Tier 1 Extension Options Novel
  - Tier 2/3

- **Mathematics**
  - Edmentum Adaptive Intervention Solution

- **Reading Horizons**
  - Tier 1

**TIER 1**

**Aligned Foundational Standards for All Children**

- All students received high-quality curriculum and instruction in the general education classroom. The teacher assists students.

**Supports**

- **English Language Arts (SLA)**
  - Edmentum Adaptive Intervention Solution
  - Read 180
  - Power Readers/Super Chargers
  - Just Words
  - Read Naturally
  - Reading Horizons
  - Read Well (PSE)
  - Core Extensions/School Based Acceleration

- **Mathematics**
  - Edmentum Adaptive Intervention Solution

**TIER 2**

**Supplemental Supports & Interventions for Some Students**

- School provides supplemental instructional support, usually in small groups, to students who need additional support.

**Supports & Interventions**

- **English Language Arts (SLA)**
  - Edmentum Adaptive Intervention Solution
  - Read 180
  - Power Readers/Super Chargers
  - Just Words
  - Read Naturally
  - Reading Horizons
  - Read Well (PSE)
  - Core Extensions/School Based Acceleration

- **Mathematics**
  - Edmentum Adaptive Intervention Solution

**TIER 3**

**Intensive Supports & Interventions for a Few Students**

- Student-centered planning is used to develop customized interventions with frequent progress monitoring.

**Supports & Interventions**

- **Student Assistance Program (SAP)**
  - Aggression Replacement Training (ART)
  - Social Skills Training
  - Therapeutic Support
  - Mentoring
  - Helping School Children Cope with Anger (Grades 3–6)
  - Second Stop Violence Prevention
  - Strong Kids
  - Restorative Practices
  - Social Emotional Learning

**Restorative Practices—MOU Items: V.d., V.e., VI.d.**

We understand that when everyone is treated with respect, classrooms are safe and healthy environments that support both teaching and learning. Restorative Practices is a positive way of living—NOT a disciplinary tool. Through Restorative Practices, students learn to connect with teachers and other students to build a strong community. Students develop appropriate social-emotional skills, come to understand how their actions affect others, and work to repair any harm done. It is an approach built on respect, communication, and strategies for success.
Thanks to a 2014 Comprehensive School Safety Initiative grant from the U.S. Department of Justice, the District launched the use of restorative practices in 22 schools across the District. The expansion of restorative practices to all schools and center programs was identified as a key strategy within Theme 1 ‘create a positive and supportive school culture’ of the District’s five-year Expect Great Things strategic plan. As of Fall of 2018, all District schools have been trained in restorative practices.

To support the implementation of Restorative Practices, the District has taken the following steps:

- Certified 18 staff Restorative Practice trainers
- Professional Development offerings available on Introduction to Restorative Practices, Using Circles Effectively & Facilitating Restorative Conference

**District Suspension Rates**

A safe and supportive learning environment is important to student success. How students are disciplined in schools has real impacts on how equitably students are treated, a school’s culture, and access to instructional time. It is important that discipline policies are appropriate and fair. Analyzing out-of-school suspensions across time, schools, and student subgroups is one way to track disciplinary trends.

As a District, we follow the Key Elements of Equitable Disciplinary Policies (Hanover, 2018):

- Specific Commitment to Equity (racial, cultural, ability)
- Family Partnerships in Policy Development
- Focus on Implementing Positive, Proactive Behavior Support Practices
- Clear, Objective Discipline Procedures
- Removal or Reduction of Exclusionary Practices
- Graduated Discipline Systems with Instructional Alternatives to Exclusion
- Procedures with Accountability for Equitable Student Outcomes

**Suspension Data**

Suspension rate is defined as the number of students who have received one or more suspensions divided by the number of students enrolled at any time during the school year. While the District has seen a significant decline in its suspension rates, a disparity remains in the rate of suspension of African-American students and all other subgroups.

“Consider eliminating suspensions in PreK-2 that do not involve immediate physical threats to the safety of students,” was among the 100 recommendations of the Council of Great City Schools. On December 20, 2017, following Board and community concerns regarding the use of exclusionary discipline for young students, the Board approved revisions to the District’s Suspension and Expulsion Policy that bans the use of out of school suspension of students enrolled in grades below third grade for non-violent minor disciplinary infractions. The change was also among more than 100 recommendations of the Council of Great City Schools to guide key initiatives underway in the District.

Suspension Ban Working Group
A working group, formed by the Board, presented recommendations for supports and services needed to implement the suspension ban. In addition to the District efforts to directly impact school climate, District leadership has taken multiple steps to reduce disparities that exist in school discipline, including:

- Implementation of a K–2 suspension ban for non-violent offenses approved by the Board of Directors.
- Introduction of new Student Codes of Conduct differentiated by age group, with one for children in grades 5 and under and one for children in grades 6 through 12;
- Review discipline data in every cabinet meeting
- Board review of discipline date at designated Board Meetings.
- Assistant Superintendent of Student Support Services reviews all long-term packets and provides feedback on the appropriateness of all disciplinary action.
- Learning Environment Specialist (6) provide training based on school level needs regarding student behavior.
- Student Support Services IT support person provides on-site training for proper input of referrals and incident creation in the eSchools platform.
A revised Drug and Alcohol Policy Administrative Regulation includes procedures to be followed by the District for students who violate the code of conduct for drug and alcohol offenses. The goal of this AR is to minimize exclusionary discipline and to provide a graduated response to the handling of drug offenses based on the severity of the infraction. The new procedures will begin on March 1, 2019.

The outlined suspension time frames for Level 3/Rule 307 violations may be reduced upon attendance to the Alcohol, Tobacco, and Other Drugs (ATOD) program. Specifically, students will serve five (5) days of the suspension period (two (2) days for students with IEPs) and the remaining days will be held in abeyance pending the opportunity to attend the ATOD Program as outlined in these guidelines.

The District provides an Alcohol, Tobacco, and Other Drug (ATOD) Diversion Program to students who have violated Code of Student Conduct rules relating to drugs, alcohol or smoking.
PPS submitted a grant proposal for a partnership with the Association of Black Psychologist (ABPsi) on a two-year, schoolwide violence prevention pilot program in up to three PPS schools. ABPsi will develop a Communiversity model that enhances the safety and security of students in targeted schools by improving their psychological and educational well-being.

The Communiversity, an interactive socio-emotional educational model rooted in empirically tested and ecologically sound principles of Black Psychology, will be tailored to address the district’s Strategic Plan outcome to eliminate the racial disparity in achievement levels of African American students by providing culturally competent programming and trauma-informed resources to students, teachers, school counselors/social workers/psychologists, school administrators (i.e., school-based staff) and parents.

Development of the program will span Year 1 and will include: 1) conducting a needs assessment with emphasis on school-based staff cultural competencies in addressing safety and security concerns and their facility in accessing/utilizing the multi-tiered system of support strategies being implemented in their buildings; 2) selection of participating schools and identification of comparable non-participating schools for comparison; 3) development of a research plan for evaluating participating and non-participating schools; and 4) curriculum development. Implementation will begin in Year 2 and will include:

1. In-residence coaching on culturally competent engagement with students;
2. Short term in-residence supportive psycho-education focusing on conflict resolution, bullying, violence prevention, etc. provided to students, school-based staff and families;
3. Ongoing strengthening of school staff’s capacity to implement multi-tiered social/emotional program strategies through the lenses of equity;
4. Parent training on creating trauma-informed, culturally responsive home environments; and
5. Communiversity program evaluation.

Safety and Security Grant Proposal for work with ABPSi

The Association of Black Psychologists (ABPSi) has developed a certification in African/Black Psychology, now known as CABP. Certification in African/Black Psychology indicates that professionals have demonstrated a level of proficiency which is displayed in their ability to integrate advanced knowledge of psycho-cultural-historical-social-spiritual paradigms, specifically for people and communities of African ancestry, into educational curriculum or program development, clinical practice, and training.

The ABPSi has proposed to offer a Level I certification to district employees. The intent of this training and certification is to enable district support staff, teachers, and administrators to apply principles of African/Black psychology in order to increase school safety and security.
The ABPsi proposes to offer a Level I certification in African/Black Psychology that provides participants with knowledge about African culture, philosophy, and worldview; the impact of the enslavement of African people on the values, attitudes, behaviors, relationships, and functioning of African Americans; racism, sexism, classism, colorism and oppression; ecologically grounded Black child and adolescent development; and culturally congruent, trauma-informed intervention strategies for working with African American families and youth. The format for the presentation of these courses are to include:

- Online courses through a university;
- Pre-convention training at the Association of Black Psychologists annual convention;
- Practicum supervision; and
- A six-week Summer Institute.

The training would be available to 10–25 students per class. Eligible participants would be guidance counselors, school psychologists, social workers, school nurses, teachers in a supervisory capacity, security staff, principals/assistant principals. Involvement of parent and community leaders is also encouraged to foster communication, cooperation, and commitment between parents and community leaders and school personnel.

A total of 15 credit hours of courses along with a practicum experience of 96 hours and 24 hours of face-to-face training would be required for Level I certification. Students will receive a total of 321 hours of training.
In addition to tracking suspension data, which in a report of end results following a referral, the District looks closely at student perception survey results to measure school culture and climate.

**Tripod Survey**

The Tripod Survey is administered two times each school year and provides the District with an opportunity to collect feedback from students on their experiences at school and with their classroom teachers. One survey item shows the percentage of students who report that they feel safe in school. Data shows that students feel most safe in elementary school settings and that this feeling decreases as students move to higher grade configurations. The data also shows that African-American students tend to feel slightly less safe than the “All” group, across all school types.

Students also respond to a variety of questions that can be grouped together to show their perceptions on school and classroom conditions. Each item is rated on a scale from 1 to 5, and the higher the score is, the more favorable their perceptions are. The data below indicates that for All students, their perceptions of classroom conditions are similar across elementary, middle and high school. But for African-American students, elementary students seemed to have slightly less favorable perceptions than African-American students in middle and high school.
BRIEF DESCRIPTION
This training is for safe and responsive schools for central and school administrators, Board members, social workers, guidance counselors, school police and school security guards in support of a decrease in the incidence of racial disproportionality in behavioral referrals and suspensions and an increase in culturally responsive interventions and supports (aligned to Equity in Discipline).

CURRENT STATE
In its “Review of the Pittsburgh Public Schools,” the CGCS stated that “suspension rates and patterns in the district indicate that students of color are suspended at disproportionately high rates. This is also true of students with disabilities and ELLs. No one in the district is held accountable for these rates...African American students with IEPs are 2.28 times more likely than students in other racial/ethnic groups to receive a 1–5 day out-of-school suspension (OSS).” While the overall suspension rate in PPS is on the decline, the disparity that CGCS noted between which students get suspended persists. In 2014–15, the 1-3 day OSS rate for Black students was 24%, compared to 8% for White students. In 2015–16, the rate for White students remained relatively unchanged, while Black student suspension rate showed only a slight decrease to 21%. PPS school police arrest records reveal an even wider disparity between Black and White students. In its analysis of arrest data from 2013–14 through 2016–17, PublicSource reported that Black students accounted for 80% of school police arrests, while White students accounted for only 8% of arrests. Statistics like these lie at the foundation of the PA Department of Education’s development of an Equity and Inclusion Toolkit, which calls upon districts to offer resources (i.e., professional development, curricula, etc.) that would increase educator knowledge regarding issues like implicit and structural bias, cultural competency, and educational equity. Answering the Department’s call, the district’s working group to reduce exclusionary discipline has recommended that the administration provide training regarding implicit biases that lead to racial disproportionality in school discipline.

DESIRED STATE
Implicit Bias Training for central and school administrators, Board members, social workers, guidance counselors, school police and school security guards would ultimately lead to a decrease in the incidence of racial disproportionality in behavioral referrals, suspensions and arrests and an increase in culturally responsive interventions and supports.

ROLES AND RESPONSIBILITIES
INITIATIVE OVERSIGHT

<table>

In the MOU, Reducing the Achievement Gap means raising the achievement of all students while (1) narrowing the gaps between the lowest and highest performing students and (2) eliminating the racial predictability and disproportionality of which student groups occupy the highest and lowest achievement categories (Singleton, 2015, p. 55). Specifically, the focus of gap closure is on the historical disparity between African American and White students through the implementation of equity-evident practices and use of a metrics to set goals and monitor progress.

The District’s Key Performance Indicators below align to the achievement metrics outlined in the MOU.

**ACHIEVEMENT METRICS**

MOU ITEMS: VII.C, VII.D

The District has proposed the following metrics for achievement, disaggregated by race and gender.

**MATH PSSA (ALL AFRICAN AMERICAN)**
- 2017–18 Baseline: 16.6
- 2018–19 Benchmark: 20.06
- 2019–20 Target: 23.52
- 2020–21 Target: 27

**ELA PSSA (ALL AFRICAN AMERICAN)**
- 2017–18 Baseline: 33.7
- 2018–19 Benchmark: 36.45
- 2019–20 Target: 39.20
- 2020–21 Target: 42

**ALGEBRA I KEYSTONE (ALL AFRICAN AMERICAN)**
- 2017–18 Baseline: 28.5
- 2018–19 Benchmark: 31.50
- 2019–20 Target: 34.50
- 2020–21 Target: 37.5

**LITERATURE KEYSTONE (ALL AFRICAN AMERICAN)**
- 2017–18 Baseline: 43.6
- 2018–19 Benchmark: 45.93
- 2019–20 Target: 48.27
- 2020–21 Target: 50.6

Additional goals for the end of the 2020–2021 school year include:
- African American graduation rates will improve from 77.4% to 80.3%.
- African American participation in advanced classes will increase from 38.2% to 46%.
4. REDUCING THE ACHIEVEMENT GAP

In the MOU, Reducing the Achievement Gap means raising the achievement of all students while (1) narrowing the gaps between the lowest and highest performing students and (2) eliminating the racial predictability and disproportionality of which student groups occupy the highest and lowest achievement categories (Singleton, 2015, p. 55). Specifically, the focus of gap closure is on the historical disparity between African American and White students through the implementation of equity-evident practices and use of a metrics to set goals and monitor progress. The District’s Key Performance Indicators below align to the achievement metrics outlined in the MOU.

ACHIEVEMENT METRICS
MOU ITEMS: VII.C, VII.D

The District has proposed the following metrics for achievement, disaggregated by race and gender.

MATH PSSA (ALL AFRICAN AMERICAN)
• 2017–18 Baseline: 16.6
• 2018–19 Benchmark: 20.06
• 2019–20 Target: 23.52
• 2020–21 Target: 27

ELA PSSA (ALL AFRICAN AMERICAN)
• 2017–18 Baseline: 33.7
• 2018–19 Benchmark: 36.45
• 2019–20 Target: 39.20
• 2020–21 Target: 42

ALGEBRA I KEYSTONE (ALL AFRICAN AMERICAN)
• 2017–18 Baseline: 28.5
• 2018–19 Benchmark: 31.50
• 2019–20 Target: 34.50
• 2020–21 Target: 37.5

LITERATURE KEYSTONE (ALL AFRICAN AMERICAN)
• 2017–18 Baseline: 43.6
• 2018–19 Benchmark: 45.93
• 2019–20 Target: 48.27
• 2020–21 Target: 50.6

ADDITIONAL GOALS FOR THE END OF 2020–2021 SCHOOL YEAR INCLUDE:
• African American graduation rates will improve from 77.4% to 80.3%.
• African American participation in advanced classes will increase from 38.2% to 46%.

*The 2023-24 Target is based on reducing the 2017–18 non-proficiency percentage in half.
**The annual target is based on six years from 2017–18 to 2023-24.
***A PPS Executive Cabinet decision was to increase annual goals by 1 point per year, for African-American students.
While the Office of Human Resources (HR) continues in its ongoing efforts to recruit, develop, and retain a diverse workforce, promising initiatives are in development. First of which, HR is developing a pipeline to enable the District’s paraprofessionals to move into positions within the teacher workforce. The racial composition of the District’s paraprofessionals closely reflects its student population (approximately 55% of our paraprofessionals and 53% of our students are Black respectively). This pipeline initiative will be implemented in two phases.

**In Phase I**, qualified paraprofessionals will be given opportunities to gain training and experience while they work as day-to-day substitutes in their buildings, thus increasing the amount of instructional time students currently receive in many of our high-needs schools. The data shows a significant correlation between low substitute teacher fill rates, low levels of student performance, and the ratio of Black students who attend the school. In addition, Black students will benefit by having respected Black adult role models in their classrooms, with whom they have already established relationships.

**In Phase II**, the District will be seeking both internal and external partnerships to provide aspiring paraprofessionals with academic and experiential opportunities to grow as classroom teachers, obtain instructional certification, and ultimately possess the qualifications to produce an increasingly diversified teacher workforce. HR is also partnering with the Teacher Academy Magnet program at Pittsburgh Brashear High School to create a formal pipeline for PPS students to become future PPS teachers. While the benefits of this pipeline program may not be realized for several years, the program abounds in opportunity for students of color to become future teachers and leaders in the District.
In 2010, The Pittsburgh Promise® piloted an initiative that would become the We Promise program in effort to reduce the racial disparity among scholarship recipients by providing the resources needed to ensure eligibility for African-American male students. African-American males were receiving significantly less financial support than White students and African-American females. As part of the program, students who needed to improve their GPAs to qualify for the scholarship met weekly with African American male mentors at Pittsburgh Allderdice and Pittsburgh Carrick.

The We Promise program quickly developed into a Pittsburgh Public Schools initiative. In the Fall of 2013 and 2014, respectively, Jason Rivers and then Branden Ballard joined the Office of Equity to coordinate and lead the work more closely with school leadership and mentors.

Over the course of the program, more than 100 African-American male educators, coaches and local community members have served as mentors to uplift the We Promise Scholars during summits and/or weekly meetings. Using strategies focused on social and emotional support and leadership development skills, the mentors strive to help these young men become Promise-eligible and college, career and life ready. Since We Promise began, the percentage of African American males qualifying for the scholarship rose from 18 percent in 2012 to 38 percent at the end of 2017.
The Promise of Sisterhood is a mentoring initiative for Black females currently piloted at 4 schools by Equity Office Project Manager Heather “IAsia” Thomas. The Promise Sisterhood takes two approaches to supporting African American females: K–12 programming focused on social-emotional-ethnic identity development and high school programming focused on post-secondary planning.

i. Promise of Sisterhood Mentoring
This initiative is currently being piloted at 4 schools by Equity Office Project Manager Heather “IAsia” Thomas.

Arsenal 6–8: The program unifies continental African and African American middle school girls with a focus on craftsmanship, entrepreneurship, and challenging stigma that divides young women due to perceived differences as opposed to guided individual and collective quest navigation for similarities and interdependence.

Miller African-Centered Academy: The program centers a rites of passage experience that infuses African centered pedagogy to guide girls into the literacy of self and collective agency, cultural enrichment, and healthy relationship cultivation between older women care givers and prepubescent girls.

Brashear High School: The program involves leading the “Diamonds and Pearls” club for continental African females, which is an opportunity to build positive racial, cultural and ethnic identities, build bridges between continental African families and the school, and provide academic enrichment through the integration of culture, health, wellness and the arts. Participants are also engaged members of the Black Girls Leadership Alliance with Gwen’s Girls.

University Prep at Milliones: The program centers on conflict resolution among African American females and aims to eliminate—not merely manage—conflict and anger by engaging in healing circles with a consistent group of students who will set personal goals pertaining to social-emotional development, self-esteem, and Umoja (Unity) so that they may emerge women and leaders as well in their schools and communities.

ii. Promise of Sisterhood Post-Secondary Planning
This is a multi-disciplinary initiative featuring an Equity Trajectory Blueprint for Post-secondary Planning. In a collaborative effort to shift the narrative regarding females of color, the Promise of Sisterhood sets forth the ambition of raising positive self-image across the personal, familial, educational, and community domains of her life.

A collaboration between the office of Equity and the Pittsburgh Promise has produced a twelve-week curriculum focused on post-secondary planning, transitioning from high school to college or university, and holistic career exploration, with topics including financial literacy and financial aid, scholarships, SAT and ACT, and Sisterhood.

The modules will take place in two parts with shared facilitation and required time for debrief and reflection. African American and Diasporic women that are experts in their professional context will be invited to share in the facilitation and evolution of the program.
5. EQUITY IN SPECIAL EDUCATION AND SPECIAL PROGRAM ACCESS

In the MOU, Equity in Special Education and Special Program Access means addressing the overrepresentation of African American students in Special Education and underrepresentation of African American students in Advanced Placement and Gifted Education. The focus is on providing all students with equitable access to the core curriculum along with opportunities to advance their studies.

To reconcile the disproportionality, the District should provide all families with the appropriate knowledge for them to make informed decisions about how to maximize learning opportunities for their children. The District should provide professional development for teachers to better understand the root causes of learning difficulties and how to support students through bias-free identification processes and equity-evident strategies and interventions aimed at student growth.

The MOU with the PHRC includes 13 items related to Equity in Special Education and Special Program Access.
5. EQUITY IN SPECIAL EDUCATION AND SPECIAL PROGRAM ACCESS

In the MOU, Equity in Special Education and Special Program Access means addressing the overrepresentation of African American students in Special Education and underrepresentation of African American students in Advanced Placement and Gifted Education. The focus is on providing all students with equitable access to the core curriculum along with opportunities to advance their studies.

To reconcile the disproportionality, the District should provide all families with the appropriate knowledge for them to make informed decisions about how to maximize learning opportunities for their children. The District should provide professional development for teachers to better understand the root causes of learning difficulties and how to support students through bias-free identification processes and equity-evident strategies and interventions aimed at student growth.

The MOU with the PHRC includes 13 items related to Early in Special Education and Special Program Access.
The development of strong learners begins in PreK. The District’s Early Childhood program serves primarily Black students; 69%. Change sentence to read. The expansion of PreK opportunities for early learners must be a priority as we aim to increase access to special programs such as Gifted and Advanced Placement.

The District’s Early Childhood Program follows both the Head Start Performance Standards as well as State Quality Rating and Improvement System. These have been used successfully throughout the State and provide appropriate models to PPS. Currently the District has more than 30 early childhood classroom across the city, including a new classroom at the Carnegie Science Center, the first of its kind in the country. For 2019–2020, the program will add a classroom at Pittsburgh Linden K–5, located in Point Breeze. Capitalizing on the success of the Early Childhood program has been identified among the District’s work to enhance its Expect Great Things strategic plan.

**OBJECTIVE**
Establish a system of instructional continuity and meaningful learning experiences for children from birth through 3rd grade.

**BRIEF DESCRIPTION**
Pittsburgh Public Schools (PPS) is committed to providing students (birth through 8 years of age) with the social-emotional and academic foundational skills that are necessary for success throughout their educational career and life. We recognize that we can’t do this work alone and will need committed community partners that can actively support our birth to age 8 efforts and support families within the school and broader Pittsburgh community.

**CURRENT STATE**
Student data identifies, that while there is no achievement gap at the end of preschool, the achievement gap increases every year from K–3rd grade.

**DESIRED STATE**
Curriculum will be aligned and build from year to year; Students will have hands-on experiences that help them to have a joyful, productive educational experience. Learning will improve and the achievement gap will narrow.

**OBJECTIVE**
Establish an equitable gifted screening and identification process.

**BRIEF DESCRIPTION**
Pittsburgh Public Schools aims to increase the number of underrepresented populations in gifted education by implementing a universal screening process. Underrepresented/underserved refers to the following: Students of color, low socio-economic, and students with a disability (twice-exceptional).

**CURRENT STATE**
Currently the district relies on parents and teachers to recommend students for gifted testing. This results in the underidentification of some of our most disadvantaged students contributing to the current state of inequity of who is being recommended for gifted testing.

**DESIRED STATE**
All students in the 2nd grade will be screened for potential gifted ability.

Participation in Advanced Placement (AP) courses allow students the opportunity to experience challenging, college-level coursework that prepares them for post-secondary success in college or technical programming. The chart below provides information on the percentage of secondary students who took one or more advanced level courses (CAS, AP, IB).

The graph on the next page demonstrates an approximately 10 percentage point difference in the participation of African-American students as compared to White students during the 2017–2018 school year.
The Gifted and Talented Education program at Pittsburgh Public Schools supports unique opportunities for students who are identified as high-achieving. Talented students that demonstrate high achievement can access Center of Advanced Studies (CAS) rigorous courses through an application process. This model allows students who may not have qualified under the gifted assessment, but who exhibit high performance on other measures, an opportunity to participate in the gifted classes.

The overall aim of the Gifted and Talented Education at Pittsburgh Public Schools is to provide educational opportunities and experiences to help students extend their learning, develop individual potential, enhance their self-concept and become life-long, independent learners.

In Summer 2018, the District held its first CAS Summer Dreamers program, designed for students on the verge of being eligible for CAS courses their freshman year of high school.

For students to graduate from high school in Pennsylvania, they must take a series of required core courses in English, Math and Science. The chart below demonstrates that a high percentage of ALL students, and within both subgroups, are enrolled in core courses in three major content areas each year.

Participation in Advanced Placement (AP) courses allow students the opportunity to experience challenging, college-level coursework that prepares them for post-secondary success in college or technical programming. The chart below provides information on the percentage of secondary students who took one or more advanced level courses (CAS, AP, IB).

The graph on the next page demonstrates an approximately 10 percentage point different in the participation of African-American students as compared to White students during the 2017–2018 school year.
Many students who take Advanced Placement (AP) Courses take the relevant AP exam at the end of the corresponding course. Most colleges will offer credits to students who score at least a three or higher on these exams.

The chart to the right provides information of the percentage of secondary students who took an AP course, and then followed this up by taking an AP exam.

The charts below provide information of the percentage of secondary students who took an AP exam, and then who scored at a three or higher.

While significant growth can be seen for the All group and both subgroups, a large disparity is seen between the performance of African-American and White students.

Additional efforts underway to expand African-American student access to special programs include:

- Expansion of the TEALS Program to eight secondary schools, bringing in high-tech volunteers into the Advanced Placement Computer Science classrooms across PPS.

- Partnership with the College Board’s “All In” Campaign Challenge to provide PPS high school students online personalized learning to boost success on the PSAT and SAT exams. In addition, the District now pays for the administration of the PSAT to 8th graders and SAT for 11th graders.

- Facilitation of professional learning and provide MTSS support for schools with low numbers of students recommended.

- Review of State Assessment Data to identify students of color who demonstrate advanced performance.

- A five-week intensive summer development camp for students who partially meet the CAS criteria through CAS Summer Dreamers.

- The Arts Education has published Instruction Pathways that display the pipeline for Advanced Placement courses in the Arts.

- The Gifted Equity Team includes school psychologist, gifted liaisons, gifted center principal, ESL department, Equity department, special education, gifted and talented office, assessment office.
Special education is intended to help children with special needs reach their maximum potential. Students may be identified as needing special education when a multidisciplinary evaluation determines that a student meets eligibility criteria as a student with disability in need of specially designed instruction.

The Program for Students with Exceptionalities (PSE) collects initial evaluation data identifying students in need of special education and completes an analysis of trends by school, disability category, placement and race. This data is utilized to provide schools with professional development and ongoing support to schools where negative data trends are observed.

The District has initiated a Multi-tiered Systems of Support (MTSS) throughout all schools. When applicable PSE staff members may play an integral role on MTSS teams and lend their expertise by providing the collaborative problem-solving process to address students’ academic and behavioral needs.

School Psychologists continue to play an integral role in the District Multi-tiered System of Support (MTSS) process and support schools in strengthening their teams. PSE has provided intensive training for School Psychologists in identifying students who are socially maladjusted versus students who are emotionally disturbed. In addition, two full-time instructional coaches to provide teacher support for a substantial amount of time on an ongoing basis. Coaches collaborate with teachers to address the needs of students and enhance instructional strategies to meet the needs of those students experiencing instructional or behavioral problems. PSE Program Officers are assigned to each school and work closely with administrators to support building level needs.

PSE has identified five (5) target schools with a pattern of referrals that indicate students of color are disproportionately placed in more restrictive environments. PSE meet as a core team in individual buildings to complete monthly LRE data review, to guide school teams in analyzing current school placements and review IEPs to ensure students movement into the Least Restrictive Environment. An action plan has been developed with the Bureau of Special Education to address LRE. This plan is valid until December 2019.

To ensure parent and family engagement, PSE adheres to Chapter 14 regulations through disseminating and explaining procedural safeguards to parents with disabilities and those who are being evaluated at a minimum once a year.
MONITORING

6. MONITORING

In the MOU, Monitoring refers to the ongoing supervision of measures of substantial progress and efforts aimed at progress. It is the responsibility of the District to create and share with the EAP and PHRC equity-focused programming reports and student data reports annually, disaggregated by race and gender. Not only will this data be used to determine if the District is making substantial progress toward gap closures, but this data will also be presented at Board meetings. Accurate data shows real-time indicators that correlate to predictive behaviors in student outcomes. While items related to monitoring the District’s progress are included throughout the District’s MOU with the PHRC, eight specific items in this are relate to data to be provided to the EAP and PHRC.

Due to the work underway as a result of its strategic plan and the recommendations of CGCS the District is well positioned to meet the data requirements of with the MOU and increase overall transparency for District stakeholders.
6. MONITORING

In the MOU, Monitoring refers to the ongoing supervision of measures of substantial progress and efforts aimed at progress. It is the responsibility of the District to create and share with the EAP and PHRC equity-focused programming reports and student data reports annually, disaggregated by race and gender.

Not only will this data be used to determine if the District is making substantial progress toward gap closures, but this data will also be presented at Board meetings.

Accurate data shows real-time indicators that correlate to predictive behaviors in student outcomes. While items related to monitoring the District’s progress are included throughout the District’s MOU with the PHRC, eight specific items in this are relate to data to be provided to the EAP and PHRC.

Due to the work underway as a result of its strategic plan and the recommendations of CGCS the District is well positioned to meet the data requirements of with the MOU and increase overall transparency for District stakeholders.
In its 2016 report, CGCS identified the lack of accurate data as a main area of improvement. The Council noted the overall lack of data systems, organizational capacity and program evaluations prevent teachers and principals from having the information they need to improve practice. In response, Superintendent Hamlet authorized the creation of a data department reporting directly to him, to serve as the District’s analysis team, giving educators information related to assessment, attendance, academic performance, absenteeism and other critical data. To lead the effort, the Superintendent hired a Chief of Data, Research, Evaluation and Assessment (DREA). Among its multiple responsibilities the DREA team meets data requirements set by the MOU through:

- Annually, the DREA department identifies and reports schools by name that have >75% African American enrollment and score <15% than the State average in both math and reading.

- The Assessment office has established a process for providing the psychometric analyses for the District developed tests back to the curriculum department. This allows the curriculum department to evaluate the question based on a statistical analysis of how the question is operating—in other words how difficult is it? Are the distractors (a,b,c,d) working like we expect them? Is the item providing information back to the teacher on the student’s understanding of the standard that the question is aligned to?

- DREA supports program evaluation done by outside contractors through data reporting and answering questions about how to interpret the data provided. The department provides summative reports, which can be used to compare schools and groups of students via dashboards. Some of these dashboards are made available to the public through the District’s website.

School-based leadership teams complete a self-assessment on Implementation Scales for MTSS, PBIS, Restorative Practices, PLCs, and the Pittsburgh Continuous Improvement Model. These self-assessments allow District Assistant Superintendents to identify exemplars, trends, and the need for targeted support. Through the Implementation Scales, School Leaders and teams rate their level of implementation on a scale from 1–4: Preplanning and Preparing (1), Initiating and Implementing (2), Deeping and Developing (3), and Sustaining and Strengthening (4).
In its 2016 report, CGCS identified the lack of accurate data as a main area of improvement. The Council noted the overall lack of data systems, organizational capacity and program evaluations prevent teachers and principals from having the information they need to improve practice. In response, Superintendent Hamlet authorized the creation of a data department reporting directly to him, to serve as the District’s analysis team, giving educators information related to assessment, attendance, academic performance, absenteeism and other critical data. To lead the effort, the Superintendent hired a Chief of Data, Research, Evaluation and Assessment (DREA). Among its multiple responsibilities the DREA team meets data requirements set by the MOU through:

- Annually, the DREA department identifies and reports schools by name that have >75% African American enrollment and score <15% than the State average in both math and reading.
- The Assessment office has established a process for providing the psychometric analyses for the District developed tests back to the curriculum department. This allows the curriculum department to evaluate the question based on a statistical analysis of how the question is operating—in other words how difficult is it? Are the distractors (a,b,c,d) working like we expect them? Is the item providing information back to the teacher on the student’s understanding of the standard that the question is aligned to?

The department provides summative reports, which can be used to compare schools and groups of students via dashboards. Some of these dashboards are made available to the public through the District’s website.

School-based leadership teams complete a self-assessment on Implementation Scales for MTSS, PBIS, Restorative Practices, PLCs, and the Pittsburgh Continuous Improvement Model. These self-assessments allow District Assistant Superintendents to identify exemplars, trends, and the need for targeted support. Through the Implementation Scales, School Leaders and teams rate their level of implementation on a scale from 1–4: Preplanning and Preparing (1), Initiating and Implementing (2), Deeping and Developing (3), and Sustaining and Strengthening (4).

Also included among the CGCS recommendation was “the development of a District-wide balanced scorecard system to assess overall school system progress with results transparent to the public.” The Pittsburgh Public Schools Data Dashboards include data related to Key Performance Indicators within the District such as Algebra 1 9th Grade Pass Rates, Graduation Rates, Pittsburgh Promise Eligibility, and performance on State Accountability Exams.

Located at www.pghschools.org/dashboards, the dashboards provide typically display metrics at both the District and school level. Metrics for important subgroups are also included, when possible.

In November 2018, the Pennsylvania Department of Education launched the Future Ready PA Index, a comprehensive system of school progress and measures to ensure accurate, transparent reporting of school data. The Future Ready PA Index includes a wide range of meaningful, evidence-based indicators, both academic and non-academic, and move beyond a single, summative score to increase transparency around school and student group performance. This dashboard approach heightens transparency around school and student performance by including data on achievement and growth by student group, including economically disadvantaged students, English Learners, students receiving special education services, and racial and ethnic groups.

Stakeholders can also track the District’s progress on the 137 recommendations by The Council on the Great City Schools at www.ppsstrategicplan.org/progress-report.

In addition to sharing making more information about student performance available on the District’s website, regular updates on the District’s progress on Key Performance Indicators are shared with the Board at its Agenda Review Meetings. In addition, both the Superintendent’s Executive Cabinet and Academic Cabinet review KPIs weekly to address the immediate needs of schools.
The 2018 State of the District marked the first time the report PPS has shared a report that not only includes District-level results, but also graduation rates, detailed suspension information, and budget information. School-level results appeared on District dashboards November 19, 2018.

In addition to publishing the State of the District report online, Superintendent Hamlet shared this presentation around the city sharing some of the District’s milestones while also soliciting input on how to best enhance its efforts. Annually the Superintendent will provide a report to the community to ensure transparency regarding the KPIs and to share updates on the implementation of the Expect Great Things strategic plan.
The 2018 State of the District marked the first time the report PPS has shared a report that not only includes District-level results, but also graduation rates, detailed suspension information, and budget information. School-level results appeared on District dashboards November 19, 2018.

Annually the Superintendent will provide a report to the community to ensure transparency regarding the KPIs and to share updates on the implementation of the Expect Great Things strategic plan.

ACTION STEP 4
7. ADMINISTRATIVE SUPPORT
DEPARTMENT OF EQUITY

In the MOU, Administrative Support focuses specifically on the roles and responsibilities of the Executive Director of Equity, which the MOU refers to as the full-time administrator or Coordinator for the District. Since the 2015 MOU was signed, there was a shift in District leadership. Angela Allie filled the Executive Director role in November 2016. The MOU includes 15 items specific to administrative support, 13 of which fall within the purview of the District’s Department of Equity. The following recommendation has been approved by the superintendent:

1. Each EAP meeting will close with recommended action items from the Equity Advisory Panel
2. The EAP Chair will share with the Executive Director of Equity written recommendations that are research-based and grounded in data-driven, District needs.
3. The Executive Director of Equity will share the recommendations with the Superintendent.
4. Within 30 days of the written recommendation, the Executive Director will follow-up with the EAP Chair by providing an initial status update, in writing, that may include plans to further explore the recommendation or an explanation as to why the recommendation will not be explored.

ANGELA ALLIE

Prior to returning to the District in 2016, Ms. Allie spent five years as principal of Propel Andrew Street High School, ranked as one of the Best High Schools in America in 2014 by U.S. News and World Report for math and reading proficiency and college preparation. Ms. Allie received her master’s degree in teaching from Hampton University and is currently a doctoral student in the School Leadership program at the University of Pittsburgh, where she spent three years as a K. LeRoy Irvis Pre-Doctoral Fellow and simultaneously served as the inaugural student fellow for the Duquesne University Center for Educational Leadership and Social Justice.

Ms. Allie began her career as an English teacher at Pittsburgh Oliver High School, where she later became an Instructional Teacher Leader, Assessment Coordinator, and curriculum writer. She is a recipient of the 2010 Equity Leadership Recognition Award from the Summit for Courageous Conversation. Her research pursuits have included Critical Race Theory in Education, the Asa G. Hilliard III and Barbara A. Sizemore Research Course on African Americans and Education, and school leadership for racial equity. Her studies and practice both reflect a commitment to systemic racial equity for historically marginalized students.

HEATHER “IASIA” THOMAS

Sis IAsia is a native of Cape Town, South Africa whose professional experiences have been realized in the context of education, multi-disciplinary cultural arts, high performance learning, and African centered arts education. Prior to joining the Equity team, she served Pittsburgh Public Schools as director for the Culturally Responsive Arts Education (CRAE) program of Pittsburgh Public Schools where she also taught African dance, artistic leadership, and creative writing to elementary, middle and high school learners.

She currently serves the District as a project manager of Equity with an emphasis on cultural relevancies in pedagogy, student identity, and transformative practice. She is interested in unifying the continental African and African American learners of PPS and their families to uplift, strengthen, and nourish the spirit of resilience innate in people of color.
JASON J. RIVERS

Jason J. Rivers has served the Pittsburgh Public Schools community for over 20 years. His areas of expertise include race in athletics, the impact of trauma on students of color, racial equity coaching, positive racial identity development, violence prevention and restorative justice. Mr. Rivers also serves as a Racial Equity Affiliate and is known for his strength and passion as a facilitator of equity focused professional learning having led sessions on local and national levels. Among his accomplishments, he helped to find the We Promise program, transform school culture through athletics, and support the development of Black Student Unions for high school students. In addition, Mr. Rivers makes a transformative impact on his community as a founding member of AR3, a summer basketball league that evolved into a restorative justice movement in the city of Pittsburgh earning the tag line its “Bigger than Basketball.”

BRANDEN BALLARD

Branden, a native of Detroit, has lived in Pittsburgh for over 16 years and joined the Pittsburgh Public Schools family in the fall of 2014. His varying experiences as a mentor to children with an incarcerated parent and with adjudicated youth have provided Branden a unique perspective on effective ways to tackle the issue of inequities within PPS, especially those revolving race and culture. Branden specializes in programming pertaining to relationship building, emotional intelligence, multicultural exposure, trauma informed care, and how race is lived daily among others.

Branden also serves as a Racial Equity Affiliate and is certified to delivery Beyond Diversity: Courageous Conversations about Race, the Efficacy Institute Envoy training, and Safety-Care: Redefining Crisis Prevention. Branden seeks to be an example to all of the scholars of PPS, and especially our young men of color, of the product of healthy relationships, a strong sense of purpose, living within your passion, hard work, and grace.

ELIZABETH BROVEY

Elizabeth has over 25 years of urban education experience involving classroom instruction, teacher leadership, training and support to academic coaches, and curriculum writing focused on teaching mathematics from an equity stance. She also achieved National Board and served as a professional development facilitator, curriculum writer and assessment developer for the University of Pittsburgh’s Institute for Learning. Her practice has been nationally recognized and utilized through the NCTM’s Principles to Action Professional Learning Toolkit.

To advance equitable learning environments, she has facilitated school-wide PLCs, New Teacher Induction and professional learning for cultural responsiveness across content areas. As a school-based coordinator for Education Uncontained, she partnered with Duquesne University to bring learning experiences that are liberating and responsive to today’s youth in the area of social justice and youth agency, critical media and organizing for change. Elizabeth joined the Equity Office in January, 2019 with a commitment to deepen her action, knowledge and effectiveness as a Racial Equity Affiliate poised to grow and support adults and children through culturally relevant teaching and learning.
ON TRACK TO EQUITY

APPENDIX

OVERVIEW OF DISPARITY DATA

The District has identified key performance indicators for measuring its progress towards its desired outcomes for students. As part of its efforts to increase transparency, the data below can be found online at www.pghschools.org/dashboards.

STATE ACCOUNTABILITY EXAM PERFORMANCE – PSSA/PASA

While not a holistic report of school progress, state exams provide a snapshot of student performance. The Pennsylvania System of School Assessment (PSSA) measures individual student performance in English Language Arts (ELA) and Mathematics in Grades 3–8, and Science in Grades 4 and 8. About four (4) percent of District students are eligible for the alternate Pennsylvania Alternate System of Assessment (PASA) exams which measure ELA and Math in Grades 3–8 and 11, and Science in Grades 4, 8 and 11.

MATHEMATICS PSSA/PASA – 3 YEARS

PSSA/PASA Mathematic results show small increases over time for the All group, African-American subgroup, and White subgroup. However, subgroup results also provide a picture of the ongoing disparity between African-American and White students. African-American students consistently performed below the District average. African-American female and male performance on the Mathematics PSSA/PASA showed similar improvements from year to year.

</tr>
</tbody>
</table>
ENGLISH LANGUAGE ARTS
In English Language Arts (ELA) each group achieved small increases in performance over time, with the exception of Multi-Racial students, who saw a small dip in 2017–18. African-American students consistently performed below the District average. African American females performed better than African American males on the ELA PSSA/PASA by approximately 10 percentage points. Both groups have demonstrated improvements from year to year.

The results on the previous page show the disparity in Mathematics achievement between Black and White students has leveled out after a slight dip in 2017. The disparity in ELA achievement between Black and White students has remained flat.
STATE ACCOUNTABILITY EXAM PERFORMANCE – KEYSTONE EXAMS

Keystone Exams are end of course exams aligned to the Pennsylvania Core Standards that measure student learning in Algebra 1, Literature and Biology. Students take these exams immediately after completing the corresponding course. Although students may take the Keystone Exams at various times throughout their high school career, results for State and Federal accountability purposes are attributed to the school when the student reaches 11th Grade.

ALGEBRA 1

In Algebra 1 the All group stayed relatively similar, with a percentage point growth across the two reported years. In 2017–2018 the African-American subgroup decreased, and the disparity between African-American and White students slightly increased.

In Algebra, African-American females performed better than African-American males by 5 percentage points. While student achievement rose in 2016–2017, both groups saw a decline in performance in 2018 when compared to 2015–16 results.

LITERATURE

On the Literature Keystone, the All group increased slightly, while the African-American subgroup showed a slight decrease. The disparity between African-American students and White students has increased.

Performance on the Literature Keystone shows the greatest disparity in achievement between the performance of African-American males and females, where a steady decline in the performance of African-American males has resulted in a 19.8 percentage gap between males and females in 2017–18.
Results on Keystone exams show the disparity in achievement between Black and White students has tripled in the past three years, and the disparity in Literature has increased by nearly 10 percentage points.

SPECIAL EDUCATION AND RACE

While results on the Math PSSA show steady increases in performance for both African American and White students with an Individualized Education Plan (IEP), an achievement gap between students with IEPs remain. There is a significant gap in achievement in English Language Arts between African American and White students with IEPs.

Data also shows a significant disparity in Algebra I, where White students with IEPs performed 22 percentage points higher than African American students with IEPs in 2017–18. The most glaring disparity is seen on the Keystone Literature exam, where African American performance steadily declined and White performance steadily improved, leaving a nearly 40 percentage point difference between African American and White students with IEPs in 2017–18.
GRADUATION RATES

Graduation rates show the percentage of students who graduate with a regular high school diploma within four years of entering ninth grade for the first time. The 4-year cohort graduation rate is based on the number of students within a group who graduate within four years. Graduation rates are reported a year later to account for credit recovery programs. Within the Pittsburgh Public Schools, the overall group, White students, and African-American students have demonstrated improvements each year since the 2015 graduating class.

In 2017, the District rate for all students increased by 10.4 percentage points from 70.4 percent to 80.8 percent. Additionally, students of both genders and African-American students also saw increases in graduation rates. While graduation rates show positive progress, we know that today's society requires more than a high school diploma. We will not be satisfied until all students graduate high school college, career, and life-ready prepared to complete a two-or four-year college degree or workforce certification.

PITTSBURGH PROMISE ELIGIBILITY

The Pittsburgh Promise provides an important opportunity for Pittsburgh families to access money to help pay for students to attend college. In order to receive scholarships, students must maintain an attendance rate of 90% or higher and a GPA of 2.5 or higher. Recognizing both the special opportunity to receive Promise scholarships and the importance of those indicators, PPS monitors students’ Promise eligibility. The District monitors the individual status of each high school student, and the District’s We Promise Program offers mentoring and support to African-American male students who need help in meeting Promise eligibility.

PERCENT OF STUDENTS ON TRACK FOR ELIGIBILITY FOR THE PITTSBURGH PROMISE

The elimination of racial disparities in achievement levels of African-American students is one of four desired outcomes of the District's 2017–2022 Strategic Plan: Expect Great Things. A review of the performance of African-American students in comparison to the White student peers, demonstrates there is a dramatic disparity in every grade level and every subject.

LONG-TERM OUTCOMES

STRATEGIC PLAN

- Increase proficiency in literacy for all students
- Ensure all students are equipped with skills to succeed in college, career and life
- Eliminate racial disparity in achievement levels of African-American students
- Increase proficiency in math for all students

LONG-TERM OUTCOME: ELIMINATE RACIAL DISPARITY IN ACHIEVEMENT LEVELS OF AFRICAN-AMERICAN STUDENTS
