The number of unique student suspended divided by the total number of unique students enrolled at any point in the school year.

Data extracted 12/30/2019
Suspension Rates for All Students: Findings

The Suspension rates for year to date are 4% lower than at the same time last year.

The suspension rates for the last two weeks in December are 5% lower than for the same time frame last year.

Mid-Year Suspension Information Things to Remember

The YTD information for the present year represents “live data” – there may be errors in the data that are not yet cleaned up...

The data accountability section of DREA (Student data entry and State reporting teams) have worked with the data warehouse team established a process to identify data irregularities through audit reports in our data warehouse.

The network support clerks provide these error reports to: Assistant Superintendents, Principals and School Data Support Specialists to have the data irregularity addressed (either verify that the data are correct or verify and correct an error)
