For what purpose are these funds being requested and how will it be implemented? (Please write in complete sentences)

These funds are requested in order to pay for flu shots for employees of the District. Providing flu shots supports both the District's Health Care Containment efforts, as well as its goals relative to employee wellness. Each year employees are afflicted with influenza, leading to illness, potential complications and absenteeism. Absenteeism is costly, both with regard to its effect on academic progress, as well as the cost of providing substitutes.

As the District is self-insured for the purpose of providing health care, the expenditure of funds from the self-insurance fund to provide flu shots and other health care services is a key strategy to reducing health care costs in the future.

*This not to exceed amount ($88,000) would only be realized if every employee received a flu shot.

Who will this benefit?

Both employees and students will benefit from less staff absenteeism if the administration of the flu vaccine reduces the outbreak of influenza among District employees.

Where and when will the activities/services occur? (location)

Flu shot clinics will be run on two dates in the fall at the PFT Building from the hours of 2 P.M.-6 P.M.

RESOLVED, that the Board of Directors of the School District of Pittsburgh authorize its proper officers to approve the installation of a lighted flagpole to be erected by Unique Services and Applications, Inc., (USA, Inc.). Additional Information:

The particular flagpole to be installed has an exposed height of 20', base diameter of 5" and a wall thickness of 0.125". The flagpole is rated to withstand winds of 130 mph with a 4' x 6' flag or 230 mph without a flag. Additional details and dimensions are shown on the attachment "Sentry-20x5x125", which also shows a cross section of its foundation. The first stage of installation involves concreting a galvanized corrugated steel foundation sleeve with base plate, grounding spike and centering wedges into stable soil. After the concrete has cured, the base of the flagpole is inserted into the foundation sleeve and the gap between the flagpole and the sleeve is filled with dry sand and sealed with an elastomer. A solar powered light will be strapped to the flagpole at about the level of the access door to automatically provide soft illumination of the flag at night. A spun aluminum flash collar at the base of the flagpole completes the installation.

Installation will be done by Unique Services and Applications, Inc., (USA, Inc.) a Pittsburgh company with four generations experience in installing and maintaining flagpoles of all heights up to 150 feet. USA, Inc. has installed and serviced many flagpoles for the Pittsburgh School District, dating back to at least 1976. Since then, they have serviced virtually every flagpole within the district, including installations, relocating 90’ steel flagpoles, wall-mounted installations, removals, painting, service calls, and have even acted as Safety Inspectors for electricians on the South High Stadium renovations. They are compliant with all applicable OSHA, state and local regulations. The Flag Factory has supplied numerous flagpoles throughout the region, a few of which are indicated on the attached flyer and many of which have been installed by USA, Inc.
